Rural Communities G. J. Lewis, 1979
Rural Communities, 1997 The course explores rural conditions in the United States from a sociologist's viewpoint It moves from the definition of rural to the practice of living surviving and prospering in

rural communities The course is wrapped up by a discussion group led by Patricia Dewees Rural sociologists Cornelia Flora Jan Flora Louis E Swanson Mark Weinberg and Jacqueline Spears participate in the discussion Rural Communities Kansas State University. Rural Clearinghouse for Lifelong Education and Development, Ohio University. Telecommunications Center, 1992 Describes a television course textbook faculty guide and study guide of the same name **Handbook of Community Movements and Local Organizations** Ram A. Cnaan, Carl Milofsky, 2006-11-28 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life , *Out Of Sight, Out Of Mind* Yvonne Vissing, 2021-03-17 Because they're small they're easy to overlook Because their voices don't carry far it's hard to hear them We'd rather not look too closely or listen too carefully And if we don't see them maybe they'll just go away But the invisible homeless cannot simply fly away to never never land or pull themselves up by their bootstraps or make a wish upon a star These homeless people are children and they are not always in the inner cities as Yvonne Vissing shows in this poignant study of families housing and poverty As many as a third of our nation's homeless are found in rural and small town America They are all too commonly out of sight and out of mind Homelessness in small towns and rural areas is on the rise Drawing on interviews with and case studies of three hundred children and their families with supporting statistics from federal state and private agencies Vissing illustrates the impact this social problem has upon education health and the economy Families vividly describe the ways they have fallen through cracks in the social structure from home ownership into homelessness Looking toward the future Vissing asks if homeless children are destined to become dysfunctional adults and provides a sixteen year old girl's moving testimony of the vagabond life her homeless family led While the economy and the very nature of the family have changed over past decades housing education and human service industries have failed to adapt Vissing provides a planning model for improving support networks within communities and challenges Americans with a fundamental philosophical question Do homeless children merit fullscale social intervention Ultimately *Out of Sight Out of Mind* compels us not merely to voice concerns for family and community values but also to assert this commitment consciously through improved essential services Reimagining Rural Gregory M. Fulkerson, Alexander R. Thomas, 2016-06-20 *Reimagining Rural* Urbanormative Portrayals of Rural Life examines the ways in which rural people and places are being portrayed by popular television reality television film literature and news media in the United States It is also an examination of the social processes that reinforce urbanormative standards that normalize urban life and render rural life as something unusual exotic or deviant This includes exploring the role of the media as agenda setting agent informing people what and how to think

about rural life Further it includes scrutinizing the institution of formal education that promotes a homogenous urban oriented curriculum while in the process marginalizing the unique characteristics of local rural communities These contributions are some of the only studies of their kind investigating popular cultural representations of rural life while providing powerful evidence and unique challenges for an urban society to rethink and reimagine rural life while confronting the many stereotypes and myths that exist

Communities, Neighborhoods, and Health Linda M. Burton, Susan P. Kemp, ManChui Leung, Stephen A. Matthews, David T. Takeuchi, 2011-02-15 Place is an important element in understanding health and health care disparities More than merely a geographic location place is a socio ecological force with detectable effects on social life independent well being and health Despite the general enthusiasm for the study of place and the potential it could have for a better understanding of the distribution of health in different communities research is at a difficult crossroads because of disagreements in how the construct should be conceptualized and measured This edited volume incorporates a cross disciplinary approach to the study of place in order to come up with a comprehensive and useful definition of place Topics covered include Social Inequalities Historical Definitions of Place Biology and Place Rural vs Urban Places Racialization of a Place Migration Sacred Places Technological Innovations An understanding of place is essential for health care professionals as interventions often do not have the same effects in the clinic as they do in varied naturalistic social settings

Community Visioning Programs Norman Walzer, Gisele Hamm, 2012-01-30 Community visioning is key in helping local public officials and community leaders create a flourishing future for their cities and is essential for the effective planning and implementation of these strategies Visioning involves collaborative goal setting to motivate actions of planners citizens and officials in order to design and carry out a strategic planning process for the successful development of the community The use of visioning since the 1980s has led to a wealth of information on the productivity of the paths it has taken The contributors all with experience working in the area review the successes and failures of the strategies and look at new innovations which are pushing the frontiers of community visioning This review of the development of visioning focuses on small and medium sized communities in North America It aims to guide citizens local leaders and planners on what strategies are best to help them revitalise their communities and ensure a prosperous future

Survival of Rural America Richard E. Wood, 2008 Shows how small farming communities the heart and soul of America are both besieged and determined to survive and reveals through vivid storytelling how the future of America is being played out on the high plains of Kansas

Multiple Capitals Approach for Upland Agricultural Systems Lois Mansfield, 2025-06-05 This book focuses on upland agricultural systems and applies a multiple capitals approach to explain what they can provide at a time when many are struggling to survive Marginal upland agricultural systems have been distorted and derailed by modern economics politics and the drive to intensification This book argues for the application of a multiple capitals approach to resource management challenges for marginal upland agricultural communities Instead of

considering what upland agricultural systems lack the book showcases how a multiple capitals framework can demonstrate the importance interrelationships and relevance of the suite of capitals natural human social cultural and financial to achieve better outcomes for upland communities broader ecosystem services and wider society more generally It is designed to connect theory to practice to provide underpinning knowledge and guidance to help upland agricultural communities thrive Drawing on case studies from the UK and Japan as well as making comparisons with Central and South American countries the book recommends tools for monitoring different forms of capital and suggests a management process driven by multiple capitals to create resilience in upland agricultural systems This book will be of great interest to students and scholars of agriculture natural resource management ecosystem services rural development and those interested in applying a multiple capitals approach more widely within policy and landscape management contexts SeaCities Joerg Baumeister, Edoardo Bertone, Paul Burton, 2020-11-28 This book presents and discusses a strategy which includes four approaches to dealing with the risk of sea level rise and other water hazards It also offers opportunities for cities to explore urban extensions such as marine estates aquatic food production systems new sea related industries maritime transport developments new oceanic tourist attractions and the designation of additional coastal ecological zones The urban interface between Sea and Cities generates therefore both burning issues and valuable opportunities and raises the question of whether it is possible to solve the former by exploiting the latter

Sustainable Intensification to Advance Food Security and Enhance Climate Resilience in Africa Rattan Lal, Bal Ram Singh, Dismas L. Mwaseba, David Kraybill, David O. Hansen, Lars Olav Eik, 2014-10-10 This 32 chapter volume represents the core of several oral and poster presentations made at the conference In addition to Introduction and Conclusion sections the book is thematically divided into 7 sections namely 1 Land Use and Farming Systems 2 Effects of Climate Change on Crop Yield 3 Soil Nutrient and Water Management for Carbon Sequestration 4 Rehabilitation of Degraded Lands through Forestry and Agroforestry 5 Management of Animal Production for Greenhouse Gas Emissions 6 Smallholder Adaptation to Climate Change and 7 Economic Social and Policy Issues It addresses these themes in the context of sustainable intensification SI It implies increasing agronomic production from the existing land while improving restoring its quality and decreasing the C or environmental footprint Simply put SI means producing more from less

Youth Programs as Builders of Social Capital Matthew Calvert, Mary Emery, Sharon Kinsey, 2013-08-07 This volume builds understanding of practices in youth and community development that create or build social capital assets at the individual group and community levels The authors explore whether programs contribute to the development of social capital at the individual and community scales thereby fostering and enhancing positive youth development as well as community development It includes articles on defining and measuring social capital through instruments designed to document impact and also to engage program participants The authors then discuss program practices that build social capital in a wide range of youth development settings from community based service learning to 4

H community clubs Finally they focus on building social capital in particular contexts including work in rural communities with the most vulnerable youth The volume is designed to help practitioners Refine their dual focus on youth and community development Clarify constructs that help translate the public value of positive youth development to community stakeholders Provide examples of practices that link youth and youth programs more intentionally to the social relationships that knit communities together This is the 138th volume of New Directions for Youth Development the Jossey Bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions
