Game Development Essentials Rick Hall, Jeannie Novak, 2008 *The Innovation Butterfly* Edward G. Anderson Jr., Nitin R. Joglekar, 2012-06-01 Product and service innovations are the result of mutually interacting creative and coordination tasks within a system that has to balance technical decisions marketplace taste personnel management and stakeholder commitment The constituent elements of such systems are often scattered across multiple firms and across the globe and constitute a complex system consisting of many interacting parts In the spirit of the butterfly effect metaphorically describing the sensitivity to initial conditions of chaotic systems this book builds an argument that innovation butterflies can in the short term take up significant amounts of effort and sap efficiencies within individual innovation projects Such innovation butterflies can be prompted by external forces such as government legislation or unexpected spikes in the price of basic goods such as oil unexpected shifts in market tastes or from a company manager s decisions or those of its competitors Even the smallest change the smallest disruption to this system can steer a firm down an unpredictable and irreversibly different path in terms of technology and market evolution In the long term they can shift the balance of the entire innovation portfolio into unplanned directions More importantly we describe how innovation leaders can influence the emergent behavior of the system for good or ill The first half of the book draws parallels from physics economics and sociology as well as evidence from multiple industries to describe the structural and behavioral causes of emergent phenomena in innovation settings as well as their often negative impacts In the second half of the book we turn to distributed management of innovation under emergence We show that innovation butterflies if improperly managed most often lead to negative outcomes On the other hand it is also argued that while the complexity of the innovation system and the desire to experiment and try new and emergent alternatives precludes precise planning innovation leaders can actually tame innovation butterflies through the design and implementation of appropriate processes strategies tools and leadership choices
