## **Secular Commonsense:**

Making Sense of the Secular Ranjan Ghosh, 2013-01-04 This book offers a wide range of critical perspectives on how secularism unfolds and has been made sense of across Europe and Asia. The book evaluates secularism as it exists today, its formations and discontents within contemporary discourses of power, terror, religion, and cosmopolitanism, and the focus on these two continents gives critical attention to recent political and cultural developments where secularism and multiculturalism have impinged in deeply problematical ways, raising bristling ideological debates within the functioning of modern state bureaucracies. Examining issues as controversial as the state of Islam in Europe and China's encounters with religion, secularism and modernization provides incisive and broader perspectives on how we negotiate secularism within the contemporary threats of terrorism and other forms of fundamentalism and state politics. However, amidst the discussions of various versions of secularism in different countries and cultural contexts, this book also raises several other issues relevant to the antitheocratic and theocratic alike, such as: Is secularism merely a nonreligious establishment? Is secularism a kind of cultural war? How is it related to terror? The book at once makes sense of secularism across cultural, religious, and national borders and puts several relevant issues on the anvil for further investigations and understanding.

M. Stevans,1902 **Speculative Theology and Common-Sense Religion** Linden J. DeBie,2008-05-15 Evangelicals in nineteenth century America had a headquarters at Princeton Charles

Hodge never expected that a former student of Princeton and his own replacement during his hiatus in Europe John W Nevin would lead the German Reformed Church's seminary in a new and in his mind destructive direction. The two along with their institutions would clash over philosophy and religion producing some of the best historical theology ever written in the United States. The clash was broad influencing everything from hermeneutics to liturgy but at its core was the philosophical antagonism of Princeton's Scottish common sense perspective and the German speculative method employed by Mercersburg. Both Princeton and Mercersburg were the cautious and critical beneficiaries of a century of European Protestant science philosophy and theology and they were intent on adapting that legacy to the American religious context. For Princeton much of the new European thought was suspect. In contrast Mercersburg embraced a great deal of what the Continent offered. Princeton followed a conservative path never straying far from the foundation established by Locke. They enshrined an evangelical perspective that would become a bedrock for conservative Protestants to this day. In contrast Nevin and the Mercersburg school were swayed by the advances in theological science made by Germany's mediating school of theology. They embraced a churchy idealism called evangelical catholicism and emphatically warned that the direction of Princeton and with it Protestant American religion and politics would grow increasingly subjective thus divided and absorbed with individual salvation. They cautioned against the spirit of the growing evangelical bias toward personal religion as it led to sectarian disunity and they warned evangelicals not to confuse numerical success with spiritual success. In contrast Princeton was alarmed at the direction of European philosophy and theology and they resisted Mercersburg with what today continues to be the fundamental teachings of evangelical theology. Princeton's appeal was in its common sense philosophical moorings which drew rapidly industrializing America into its arms. Mercersburg countered with a philosophically defended churchly idealism based on a speculative philosophy that effectively critiqued what many to this day find divisive and dangerous about America's current Religious Right.

*Common Sense in Early 18th-Century British Literature and Culture* Christoph Henke, 2014-10-14

While the popular talk of English common sense in the eighteenth century might seem a by-product of familiar Enlightenment discourses of rationalism and empiricism this book argues that terms such as common sense or good sense are not simply synonyms of applied reason. On the contrary the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote in order to contain the unbounded discursive proliferation of modern learning. Hence common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth century Britain against the backdrop of patriotic national self-concepts. This study discusses early eighteenth century common sense in four broad complexes as to its discursive functions that are ethical which at that time implies aesthetic as well transgressive as a corrective political in patriotic constructs of the nation and repressive of otherness. The selection of texts in this study strikes a balance between dominant literary culture Swift Pope Defoe Fielding Johnson and the periphery such as pamphlets and
