Table 10.4 Summary of Discounted Cash Flow Valuation of Bonds, Preferred Stock, and Common Stock

Bonds and preferred stock share a promised cash payment to the security holder. In the case of a bond, interest and principal must be paid in accordance with the terms of the bond contract provided. Preferred shares have stated dividend rates, which when multiplied by the face or par value of the preferred stock, yield the promised preferred dividend. Both bonds and preferred stock are valued by discounting these promised cash flows back to the present. However, since these are promised (and not expected) cash flows, we discount the cash flows using promised rate of return as reflected in current market prices of similar securities. Common stock, on the other hand, does not have a contractual promised dividend payment, so we apply the discounted cash flow method to the interest by estimating expected future dividends and then discounting them back to the present, using the expected rate of return that an investor would require if investing in a stock with the risk attributes of the shares being valued.

Type of Security	Cash Flow	Discount Rate	Valuation Model
Bond	Promised interest and principal payments. These payments are set forth in the contract between the bond issuing company and the owner of the bond.	Market's required yield to maturity (YTM) on bonds. Typically the YTM on a similar bond is used to value a bond. The YTM is the internal rate of return to the bondholder only if all promised payments are made on time. Consequently, the yield to maturity calculated for a bond is a promised yield and not the expected yield.	$\text{Bond Value} = \text{Interest} \left[\frac{1 - \frac{1}{(1 + \text{YTM}_{\text{bonds}})^N}}{\text{YTM}_{\text{bonds}}} \right] + \text{Principal} \left[\frac{1}{(1 + \text{YTM}_{\text{bonds}})^N} \right]$
Preferred stock	Promised dividends. Dividends are defined using a continuously or dividend yield that is multiplied by the par or face value of the preferred stock to get the preferred stock dividend.	Market or promised yield on preferred stock. We typically calculate this yield using market prices and promised dividends for similar shares of preferred stock. This yield is a promised yield that will only be earned if the preferred stock dividends are fully paid every period as promised.	$\text{Value of Preferred Stock } (V_{PS}) = \frac{\text{Annual Preferred Stock Dividend}}{\text{Market's Required Yield on Preferred Stock}}$ $= \frac{D_{PS}}{r_{PS}}$
Common stock	Expected future dividends. No dividend is promised for common stock. Instead dividends must be estimated, so we value common stock using expected rather than promised future cash flows. As the common dividend growth rate (which dividends are estimated using a constant rate of growth from year to year)	Investor's expected rate of return, which is the investor's required rate of return. Since common stock dividends are risky we must use expected future dividends and discount them using a risk-adjusted or expected rate of return for investing in shares of stock of firms with similar risk to the common stock being valued. We can estimate this expected rate of return using the CAPM.	$\text{Value of Common Stock } (V_{CS}) = \frac{D_1(1 + g)}{r_{CS} - g}$

Securities Valuation:

Firm, Equity Asset, and Fixed Income Securities Valuation Vusani Moyo, 2024-08-12 This textbook begins by introducing the concept of the time value of money and explaining how it is applied in valuation. It then uses practical and easy to understand examples to illustrate the application of the time value of money concept in valuing cash flows, annuities, and perpetuities. This is followed by an in-depth discussion of the firm's financing sources and the determination of its cost of capital. The remainder of the textbook discusses the valuation of fixed income securities, equity assets, and the firm, featuring specific examples and case studies from South Africa, Europe, and the Americas. Equity asset and firm valuation approaches discussed include variants of single and multiple stage growth dividend discount models, free cash flows, residual income, and multiple valuation approaches. The practical examples and case studies equip students with the tools they need to apply these valuation approaches. Aimed at upper undergraduate and postgraduate accounting and finance students, this textbook discusses in which context each valuation approach is most appropriate. Electronic supplementary materials are available online by chapter.

Accounting and Valuation Guide: Valuation of Privately-Held-Company Equity Securities Issued as Compensation AICPA, 2016-10-31 This new Guide has been developed by AICPA staff and the Equity Securities Task Force and is the first in a series of 3 NEW AICPA Accounting Valuation Guides to be released. This long anticipated release reflects best practices developed over the previous decade. Since the issuance of FASB ASC 718 and 505-50 in 2004, valuing stock-based compensation (cheap stock) has been a significant challenge for private companies. This New Guide has been designed to mitigate those challenges. It brings you practical guidance and illustrations related to accounting disclosures and valuation of privately held company equity securities issued as compensation. This guide includes: Evaluating private and secondary market transactions; What should companies do when transaction activity doesn't match their estimates of value; Adjustments for control and marketability; How should companies think about the value of the enterprise for the purpose of valuing minority securities; When is it appropriate to apply a discount for lack of marketability and how should the estimated discount be supported; Highly leveraged entities; How should companies incorporate the fair value of debt in the valuation of equity securities; What is the impact of leverage on the expected volatility of various securities. The relevance of ASC 820, SFAS 157 to cheap stock issues. Updated guidance and illustrations regarding the valuation of and disclosures related to privately held company equity securities issued as compensation. This Guide also provides expanded and more robust valuation material to reflect advances in the theory and practice of valuation since 2004. This edition includes guidance from FASB ASC 718, 505-50, 820-10, and SSVS 1, which were all issued since the last AICPA guidance dedicated to this issue.
