Security And Politics In South Africa The Regional Dimension

D. Lee, I. Taylor, P. Williams

Security And Politics In South Africa The Regional Dimension:

Security and Politics in South Africa Peter Vale, 2003 In this analysis of South Africa's postapartheid security system Peter Vale moves beyond a realist discussion of interacting states to examine southern Africa as an integrated whole Vale argues that despite South Africa's manipulation of state structures and elites in the region for its own ends the suffering endured under the apartheid regime drew the region together at the popular level and economic factors such as the use of migrant labor reinforced the process of integration Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century

Security and Politics in South Africa Peter C. J. Vale, 2003 Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century BOOK JACKET

South Africa and the Logic of Regional Cooperation James J. Hentz, 2005 Examines South Africa's role in regional political economy since its transition to democracy

Security and Democracy in Southern Africa Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007 A study of the ambiguity of democratization and how it can generate violence Southern Africa has embarked on one of the world's most ambitious security co-operation initiatives seeking to roll out the principles of the United Nations at regional levels This book examines the triangular relationship between democratization the character of democracy and its deficits and national security practices and perceptions of eleven southern African states Based on national studies conducted by African academics and security practitioners over three years it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co-operation in the developing world The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict Building a common security regime in southern Africa will require moving beyond regime solidarity In particular progress will mean building multinational institutions entrenching democratic practices drawing on civil society and integrating the southern African project with that of the African Union The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system

The New Multilateralism in South African Diplomacy D. Lee, I. Taylor, P. Williams, 2006-05-10 The New Multilateralism in South African Diplomacy provides a detailed analysis of how post apartheid South Africa has participated in multilateral diplomacy in a variety of sub regional regional and international settings during the last decade The book will interest scholars interested in multilateralism and South African foreign policy

Reflections on War Ian Liebenberg, 2012-10-01 Reflections on War is a comprehensive and objective investigation into the problems of war The book explores the crucial link between theory

strategy and objectives in war taking all the evidence and theory into account and should be of interest to military practitioners specialists in defence studies and others interested in military history Also notable about the work is its ability to draw insights together from international legal theory management sciences history sociology and the political economy of war showing due respect for the moral complexities involved in waging war

The Oxford Handbook of Peaceful Change in International Relations T. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world s key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter Keywords Peaceful Change War Security International Relations Theory Sources of Change Systemic Theory Realism Liberalism Constructivism Critical Theories

Security Studies Associate Professor Elliott School of International Affairs Paul D Williams, Dr, Paul D. Williams, 2008-06-03 Security Studies is the most comprehensive textbook available on security studies It gives students a detailed overview of the major theoretical approaches key themes and most significant issues within security studies Part 1 explores the main theoretical approaches currently used within the field from realism to international political sociology Part 2 explains the central concepts underpinning contemporary debates from the security dilemma to terrorism Part 3 presents an overview of the institutional security architecture currently influencing world politics using international regional and global levels of analysis Part 4 examines some of the key contemporary challenges to global security from the arms trade to energy security Part 5 discusses the future of security Security Studies provides a valuable teaching tool for undergraduates and MA students by collecting these related strands of the field together into a single coherent textbook

The African Union Samuel M. Makinda, F. Wafula Okumu, 2007-11-13 A comprehensive examination of the work of the African Union AU with special emphasis on its capacity to meet the challenges of building and

sustaining governance institutions and security mechanisms Samuel Makinda and F Wafula Okumu show how Africa and in particular the AU can effectively addressed the challenges of building and sustaining governance institutions and security mechanisms only if they have strategic leadership Current debates on and criticisms of leadership in Africa are also analyzed as well as key options for overcoming the constraints that African leaders face Core topics covered include the colonial policies of the European powers the emergence of Pan Africanism the creation of the Organization of African Unity OAU in 1963 the evolution of the OAU into the AU in 2002 the AU s capacity to address poverty alleviation conflict management and resolution peacebuilding and humanitarian intervention **The International in Security, Security in the International**

Pinar Bilgin,2016-07-15 International Relations continues to come under fire for its relative absence of international perspectives In this exciting new volume Pinar Bilgin encourages readers to consider both why and how non core geocultural sites allow us to think differently about key aspects of global politics Seeking to further debates surrounding thinking beyond the West non West divide this book analyzes how scholarship on and conceptions of the international outside core contexts are tied up with peripheral actors search for security Accordingly Bilgin looks at core periphery dynamics not only in terms of the production of knowledge in the production of IR scholarship or material threats but also peripheral actors conceptions of the international in terms of standard of civilization and their more contemporary guises which she terms as hierarchy in anarchical society The first three chapters provide a critical overview of the limits of our theorizing about IR and security as well as a discussion on the track record of critical approaches to IR and security in addressing those limits The following three chapters offer one way of addressing the limits of our theorizing about IR and security by inquiring into the international in security security in the international Each of these chapters makes a theoretical point and illustrates this further in a spotlight section that further illustrates the point to aid student learning A genuinely innovative contribution to this rapidly emerging field within IR this book is essential reading for students and scholars of critical security international relations theory and Global IR **Connecting South-South Communities**

Muhammed Haron,2019-01-03 In addition to offering a comprehensive overview and fair insight over more than twenty five years into the relations between two South Middle Powers namely South Africa and Malaysia this book also discusses them within their respective regional structures and evaluates their respective diplomatic and commercial connections It also explores issues that have generally be neglected by International Relations specialists and in this regard it gives attention to cultural contacts that bring to the fore the critical role of non state actors in international affairs Since the ideas espoused by South Africa and Malaysia s political leaders are rooted in their specific national and broad regional philosophies the study also unpacks the notions of the African ways vis vis the Asian ways in maintaining and sustaining state to state relations within the two regions This book which uses Critical Theory as an appropriate framework that takes full cognisance of various developments in International Relations will be of interest to scholars and researchers in both the Social Sciences and the Humanities *International Security and*

the United States Paul Bellamy, Karl DeRouen Jr., 2007-12-30 Shaped by often very dramatic events international security and the international system have changed significantly in recent years The conclusion of the Cold War the emergence of new political systems the growth of significant threats such as terrorism and the development of new security doctrines have driven global transformation These volumes provide detailed information on countries from every geographic region and continent on the globe evaluating their relationship with the United States and measuring the potential security threats posed by each The contributors consider factors such as geography and history the political systems of each state their human rights records the ability to maintain law and order and provide security within their own borders the impact of current administrations rulers or regimes on a nation s foreign policy and the regional factors that often dictate local politics in order to make their assessments All of the entries in this set follow a standardized outline and present a concise but detailed assessment of each country Each entry begins with a discussion of geography through which the contributors identify the state s natural resources environmental issues and the extent of its territorial jurisdiction The focus then shifts to social and political organizations Populations are broken down by not only numbers but by ethnic and religious affiliations access to health care education housing and income All of those aspects are often a reflection of the system of government in place Like the United States those governments are comprised of different parties or leaders with various interests The contributors assess those entities and interests within each country They measure the ways in which factors of religion nationalism and globalism impact and shape not only domestic policies but also foreign policy and ultimately the country s relationship to the United States Other areas such as military organizations and activities records on human rights and justice recognition of and adherence to international conventions and national attitudes towards security are also considered Every entry also includes an assessment of current and potential security issues and an analysis of current terrorist threats that may already be in place or that are beginning to develop in various nations Each entry concludes with a summary of current relationships with the United States Those relationships are defined by the identification and brief analysis of formal trade aid or military treaties in place between the United States and other nations the general attitude of a nation s citizenry and its government towards the U S and finally identifying any social and cultural links between nations and the U S migration patterns language economies Finally possible changes and trends that will impact security issues are identified by the contributors Taken in their entirety these encyclopedias contain a wealth of information in a concise format that will serve as a valuable reference guide not only for specialists but general readers as well **Security Studies** Paul D.

Williams, 2008-06-03 Security Studies is the most comprehensive textbook available on security studies It gives students a detailed overview of the major theoretical approaches key themes and most significant issues within security studies Part 1 explores the main theoretical approaches currently used within the field from realism to international political sociology Part 2 explains the central concepts underpinning contemporary debates from the security dilemma to terrorism Part 3 presents

an overview of the institutional security architecture currently influencing world politics using international regional and global levels of analysis Part 4 examines some of the key contemporary challenges to global security from the arms trade to energy security Part 5 discusses the future of security Security Studies provides a valuable teaching tool for undergraduates and MA students by collecting these related strands of the field together into a single coherent textbook *Theory of World Security* Ken Booth, 2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies **Region-Building in Southern Africa** Chris Saunders, Gwinyayi Albert Dzinesa, Dawn Nagar, 2013-07-04 How successful have Southern African states been in dealing with the major issues that have faced the region in recent years What could be done to produce more cohesive and effective region building in Southern Africa In this original and wide ranging volume which draws on an interdisciplinary team of mainly African and African based specialists the key political socio economic and security challenges facing Southern Africa today are addressed These include the various issues confronting the Southern African Development Community SADC and its institutions such as HIV AIDS migration and xenophobia land grabbing and climate change and the role of the main external actors involved with the region including the United Nations the European Union the United States and China The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions including the Development Bank of Southern Africa and Industrial Development Corporation and issues of gender and peacebuilding In doing so the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation suggesting how region building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world *Civil Society Regionalization in Southern Africa* Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of

trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa

Foreign Policy in Post-Apartheid South Africa Adekeye Adebajo, Kudrat Virk, 2017-12-18 South Africa is the most industrialized power in Africa It was rated the continent's largest economy in 2016 and is the only African member of the G20 It is also the only strategic partner of the EU in Africa Yet despite being so strategically and economically significant there is little scholarship that focuses on South Africa as a regional hegemon This book provides the first comprehensive assessment of South Africa's post Apartheid foreign policy Over its 23 chapters and with contributions from established Africa Western Asian and American scholars as well as diplomats and analysts the book examines the current pattern of the country's foreign relations in impressive detail The geographic and thematic coverage is extensive including chapters on the domestic imperatives of South Africa's foreign policy peace making defence and security bilateral relations in Southern Central West Eastern and North Africa bilateral relations with the US China Britain France and Japan the country's key external multilateral relations with the UN the BRICS economic grouping the African Caribbean and Pacific Group ACP as well as the EU and the World Trade Organization WTO An essential resource for researchers the book will be relevant to the fields of area studies foreign policy history international relations international law security studies political economy and development studies

Globalising the Regional, Regionalising the Global: Volume 35, Review of International Studies Rick Fawn, 2009-04-30 A collection of leading international scholars examine the concept of regions from a range of perspectives and assess leading contemporary examples

Towards a Common Defence and Security Policy in the Southern African Development Community Hussein Solomon, 2004 From a historical post apartheid perspective this book argues that apartheid destabilisation in the Southern African sub region resulted in a particular form of regionalisation which favoured state security over human security stressed solidarity and regarded external intervention as inimical to its own interests It argues that this stance was fundamentally anti democratic and that its legacy haunts the organs SADC and the SADC Organ on Politics Defence and Security as the premier vehicles for security cooperation in the region The book argues that a further legacy of apartheid destabilisation was to foster national sovereignties at the expense of a collective regional identity the present challenge being for SADC to decide how best to move to considerations of regional security It then addresses issues such as the need to develop a common military doctrine command training and control The book is divided into three parts The first provides historical background to the current developments outlining the challenges facing the region's policymakers and citizens The second part focuses on the nuts and bolts of defence cooperation among the SADC states The

final part addresses the SADC Organ on Politics Defence and Security its institutional problems and outlines possible mechanisms for correcting them The contributors are mostly connected with the Africa Institute of South Africa and the University of Pretoria

The Politics of Water Kai Wegerich, Jeroen Warner, 2010-07-20 This authoritative reference work gives timely information on the global politics of water Readers will find case studies on a variety of complex water situations from the Okavango River that flows through Angola Namibia and Botswana to the Euphrates Tigris of the Upper Persian Gulf With the current threat of climate change and increasing demand on water resources the book gives valuable insight into an increasingly politicized topic Politics of Water is a welcome addition to Routledge's extensive The Politics of reference series Readers will benefit from essays on major topics in water politics from a variety of contributors thirteen in all including Is water politics Towards international water relations and The politics of water and mining in South Africa sensitive debate on gender issues reflecting the fact that in many cultures men are responsible for the supply of water and women as cultivators and house keepers are the major users an A Z glossary of key terms issues organizations etc in water politics information on selected major river basins of the world including maps detailing water consumption and resources The Politics of Water is a useful guide to the politics surrounding the availability and provision of water on a world wide scale It will prove to be a useful reference source for anyone interested in or studying the politics of water and climate change
