The Church School Journal ,1876 *Performing Human Consciousness* Vanessa Dodd, 2024-09-30 Is the mind like a theatrical performance This comparison has often been used as a conceptual tool by neuroscientists philosophers and psychologists in trying to understand what constitutes the human mind and in particular how the comings and goings and the character transformations on the stage and in the scripted text give us visible access to the hidden workings of the human mind Performing Human Consciousness makes use of this metaphor to explore the variety of ways in which the private thoughts and feelings we all have bring into play many aspects of persistent philosophical questions over how the essentially private world of personal experiences can relate to and communicate with the common public world To investigate this generalisation in more detail the author brings into play her own conscious experiences by making use of an auto inscribed play Being Me Through this dramatic medium she seeks to show in detail how phenomenal consciousness is captured through the dramatic play text and thereby made known to others through performance of that text Broadening out her argument further the author then embarks on an enquiry into a selection of play texts from an historical variety of perspectives from the early Greek and Mediaeval dramas through to the Symbolist period and onwards to the present day demonstrating the variety of ways in which they illustrate her argument This book will be of great interest to

 Colombetti,2014-01-01 A proposal that extends the enactive approach developed in cognitive science and philosophy of mind
 to issues in affective science In *The Feeling Body* Giovanna Colombetti takes ideas from the enactive approach developed
 over the last twenty years in cognitive science and philosophy of mind and applies them for the first time to affective science
 the study of emotions moods and feelings She argues that enactivism entails a view of cognition as not just embodied but also
 intrinsically affective and she elaborates on the implications of this claim for the study of emotion in psychology and
 neuroscience In the course of her discussion Colombetti focuses on long debated issues in affective science including the
 notion of basic emotions the nature of appraisal and its relationship to bodily arousal the place of bodily feelings in emotion
 experience the neurophysiological study of emotion experience and the bodily nature of our encounters with others Drawing
 on enactivist tools such as dynamical systems theory the notion of the lived body neurophenomenology and
 phenomenological accounts of empathy Colombetti advances a novel approach to these traditional issues that does justice to
 their complexity Doing so she also expands the enactive approach into a further domain of inquiry one that has more
 generally been neglected by the embodied embedded approach in the philosophy of cognitive science *Beginning*

Relationship Lee Thayer, 2017-04-24 This book is about all of the kinds of relationships people can have It is a very insightful book about how relationships emerge But it is also about how indispensable they are to our ongoing sense of being who we are in the worlds we inhabit We have relationships with various people But we also have relationships with our possessions with our pets and with our pens and car keys We have relationships with the foods we eat the places we go and the diversions we take We have relationships with the news we attend to the gossip we consume and the places we are familiar with We have relationships with our clothes our lotions and potions our grooming equipment our computers and our snow shovels Taken together all of the relationships we have had have today and will have in the future attach us to our worlds in an admixture of pushes and pulls on our attention and our behavior Metaphorically it might visually look much like an intricate circular spider web with us individually stuck at the core We use the singular relationship here because we want to explore what it is that all relationships have in common relationship Relationships are sticky They are far easier to fall into than to escape from They are often demanding requiring our attention when we wanted to devote our attention elsewhere The drama of misplaced keys or a balky computer can take over our lives We have hopes for certain relationships We can be disappointed in how they turn out But most of the myriad relationships that affect our lives just sort of happen If they dont serve our purposes as we think we deserve we drop them A piece of clothing that just doesnt look right in the light can be dropped Thats something you cant do with your own body You have a relationship with your body If youre rich you can get a remodeling job If youre not you may be stuck with the body youve got Some relationships bring us down Other relationships lift us up In this book you will learn how to create the kinds of relationships you need to get to where you want to go The relationship you have with yourself is key This book reveals to you how if you get that right most of the other relationships you live in and by will fall into place
