**Creature Comforts** Rochelle Holt,2008 To understand the shifting emotions human beings go through daily regarding any and all relationships to family friends lovers acquaintances and strangers ourselves included each of us needs to continue to evolve and to become educated while living creatively in a stressful society and world My original purpose was to match a different animal and subject for every day of the year As it turned out some months have more entries than others but none is less than a month without Sundays and or weekends Often true benefit only takes place when the self who feels victimized expresses emotions on paper i e in form of a missive to someone else to comprehend whatever may be bothering the letter writer But these letters aren t intended to be sent they are private Instead consider this volume a way and means to comfort and or offer a solution or resolution to a troubling issue For only by appreciating ourselves can we totally fathom others before ultimately caring about humanity at large enough to accept and tolerate eventually love each other s distinct uniqueness in this vast universe still striving for peace and harmony Writing letters has become a dying art So too comprehending the significance of all creatures to balance our environment that is dependent on survival of on animals and insects Perhaps you won t be able to resist sending one or two missives to the

and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals
