Seeking Security And Development:

Conflict, Security and Development Paul Jackson, Danielle Beswick, 2014-11-07 This textbook draws on academic theory field research and policy developments to provide an overview of the connections between security and development before during and after conflict This 2nd edition is revised and updated to take account of changes that have occurred in both policy and academic arenas which are relevant to students and practitioners in this area In an interdependent world it is often argued that the challenges of underdevelopment and insecurity have global implications This textbook charts an accessible course through these complex debates providing a comprehensive introduction for those encountering these issues for the first time The main aims of the revised edition are to set out how thinking on conflict security and development has changed over time and continues to evolve to explore the consequences of these changes particularly for the theory and practice of development and security promotion to introduce a range of case studies from across the globe in order to explore the implications of a combined approach to security and development The authors are experienced in both the theory and the practice of this field and illustrate the links between conflict security and development with practical examples drawing on key case studies from the past twenty years Each chapter is informed by student pedagogy and the book will be essential reading for all students of development studies war and conflict studies and human security and is recommended for students of international security and IR in general

Seeking Security in an Insecure World Dan Caldwell, Robert E. Williams Jr., 2016-02-24 This revised edition of Seeking Security in an Insecure World provides a thorough accessible introduction to contemporary security studies All chapters are updated and a wide range of new topics are discussed including the Syrian civil war Russia's annexation of Crimea and its intervention in East Ukraine the global refugee crisis China's military buildup the impact of fracking on oil and gas markets and rapidly evolving cyberwar capabilities Each chapter also addresses what has been and can be done to enhance security Overall Seeking Security in an Insecure World offers a clear and compelling framework for understanding what security means today and how it can best be achieved

Security and Development in Global Politics Joanna Spear, Paul D. Williams, 2012-03-06 Security and development matter they often involve issues of life and death and they determine the allocation of truly staggering amounts of the world's resources Particularly since the start of the wars in Afghanistan and Iraq there has been momentum in policy circles to merge the issues of security and development to attempt to end conflicts create durable peace strengthen failing states and promote the conditions necessary for people to lead healthier and more prosperous lives In many ways this blending of security and development agendas seems admirable and designed to produce positive outcomes all around However it is often the case that the two concepts in combination do not receive equal weight with security issues getting priority over development concerns This is not desirable and actually undermines security in the longer term Moreover there are major challenges in practice when security practitioners and development practitioners are asked to agree on priorities and work

together Security and Development in Global Politics illuminates the common points of interest but also the significant differences between security and development agendas and approaches to problem solving With insightful chapter pairings each written by a development expert and a security analyst the book explores seven core international issues aid humanitarian assistance governance health poverty trade and resources and demography Using this comparative structure the book effectively assesses the extent to which there really is a nexus between security and development and most importantly whether the link should be encouraged or resisted

Chinese Strategy and Military Modernization in 2015

Anthony H. Cordesman, Steven Colley, 2016-01-12 China's emergence as a global economic superpower and as a major regional military power in Asia and the Pacific has had a major impact on its relations with the United States and its neighbors China was the driving factor in the new strategy the United States announced in 2012 that called for a rebalance of U S forces to the Asia Pacific region At the same time China's actions on its borders in the East China Sea and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers

Rethinking the Security-Development Nexus

Sasha Jespersen, 2016-12-01 This book critically examines the security development nexus through an analysis of organised crime responses in post conflict states As the trend has evolved the security development nexus has received significant attention from policymakers as a new means to address security threats Integrating the traditionally separate areas of security and development the nexus has been promoted as a new strategy to achieve a comprehensive people centred approach Despite the enthusiasm behind the security development nexus it has received significant criticism This book investigates four tensions that influence the integration of security and development to understand why it has failed to live up to expectations The book compares two case studies of internationally driven initiatives to address organised crime as part of post conflict reconstruction in Sierra Leone and Bosnia Examination of the tensions reveals that actors addressing organised crime have attempted to move away from a security approach resulting in incipient integration between security and development but barriers remain Rather than discarding the nexus this book explores its unfulfilled potential This book will be of much interest to students of war and conflict studies development studies criminology security studies and IR in general

Security Sector Governance/Reform and Sustainable Development Goal-16 Oya Dursun-Özkanca,2021-05-27 This Security Sector Reform SSR Paper offers a universal and analytical perspective on the linkages between Security Sector Governance SSG SSR SSG R and Sustainable Development Goal 16 SDG 16 focusing on conflict and post conflict settings as well as transitional and consolidated democracies Against the background of development and security literatures traditionally maintaining separate and compartmentalized presence in both academic and policymaking circles it maintains that the contemporary security and development related challenges are inextricably linked requiring effective measures with an accurate understanding of the nature of these challenges In that sense SDG 16 is surely a good step in the right direction After comparing and contrasting SSG R and SDG 16 this SSR Paper argues that human security lies at the heart of the nexus between the 2030 Agenda of the United Nations UN and SSG R To do so it first provides a brief overview of the scholarly and

policymaking literature on the development security nexus to set the background for the adoption of The Agenda 2030 Next it reviews the literature on SSG R and SDGs and how each concept evolved over time It then identifies the puzzle this study seeks to address by comparing and contrasting SSG R with SDG 16 After making a case that human security lies at the heart of the nexus between the UN s 2030 Agenda and SSG R this book analyses the strengths and weaknesses of human security as a bridge between SSG R and SDG 16 and makes policy recommendations on how SSG R bolstered by human security may help achieve better results on the SDG 16 targets It specifically emphasizes the importance of transparency oversight and accountability on the one hand and participative approach and local ownership on the other It concludes by arguing that a simultaneous emphasis on security and development is sorely needed for addressing the issues under the purview of SDG 16
