Seismic Refraction Prospecting:

Seismic Refraction Prospecting Society of Exploration Geophysicists, 1967 This volume is a compilation of the newer techniques of refraction seismic surveying It contains a series of articles written principally by members of SEG who are specialist in refraction techniques The volume contains only new materials with a bibliography of references to other refraction materials available The majority of the papers are of a technique type which describe some particular interpretation technique that may be used for better interpretation of special refraction data **Seismic Refraction**

Groundwater Prospecting and Management H. P. Applied Geophysics W. M. Telford, L. P. Geldart, R. E. Sheriff, 1990-10-26 This is the completely revised and updated version of the popular and highly regarded textbook Applied Geophysics It describes the physical methods involved in exploration for hydrocarbons and minerals which include gravity magnetic seismic electrical electromagnetic radioactivity and well logging methods All aspects of these methods are described including basic theory field equipment techniques of data acquisition data processing and interpretation with the objective of locating commercial deposits of minerals oil and gas

and determining their extent In the fourteen years or so since the first edition of Applied Geophysics many changes have taken place in this field mainly as the result of new techniques better instrumentation and increased use of computers in the field and in the interpretation of data The authors describe these changes in considerable detail including improved methods of solving the inverse problem specialized seismic methods magnetotellurics as a practical exploration method time domain electromagnetic methods increased use of gamma ray spectrometers and improved well logging methods and interpretation
