Lotus International ,2002 **Hassan Fathy and Continuity in Islamic Arts and Architecture** Ahmad

Hamid,2010-11-01 Hassan Fathy the Egyptian architect known for his recognition of the potential of vernacular forms as a vital force in contemporary architectural design sought to integrate the traditions of Islamic art with his modern visions for living Guided by Fathy s principles Ahmad Hamid an architect who collaborated with Hassan Fathy in the Institute for Appropriate Technology identifies questions about the nature of Islamic art and its building culture as well as the origins of modern architecture This richly illustrated book provides new insights into Hassan Fathy s profuse pathbreaking design documents and built projects while exploring the socioeconomic environmental psychological and esthetic components of Fathy s work in the light of a quest for a new universal modernity for the twenty first century **Fairground Attractions**

Deborah Philips,2012-01-19 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com The study investigates the cultural production of the visual iconography of popular pleasure grounds from the eighteenth century pleasure garden to the contemporary theme park Deborah Philips identifies the literary genres including fairy tale gothic horror Egyptiana and the Western which are common to carnival sites tracing their historical transition across a range of media to become familiar icons of popular culture Though the bricolage of narratives and imagery found in the contemporary leisure zone has been read by many as emblematic of postmodern culture the author argues that the clash of genres and stories is less a consequence of postmodern pastiche than it is the result of a history and popular tradition of conventionalised iconography **Geography Unbound** Anne Godlewska,1999 At the end of the eighteenth century French geographers faced a crisis Though they had previously been ranked among the most highly regarded scientists in Europe they suddenly found themselves directionless and disrespected because they were unable to adapt their descriptive focus easily to the new emphasis on theory and explanation sweeping through other disciplines Anne Godlewska examines this crisis the often conservative reactions of geographers to it and the work of researchers at the margins of the field who helped chart its future course She tells her story partly through the lives and careers of individuals from the deposed cabinet geographer Cassini IV to Volney von Humboldt and Letronne innovators in human physical and historical geography and partly through the institutions with which they were associated such as the Encyclop die and the Jesuit and military colleges Geography Unbound presents an insightful portrait of a crucial period in the development of modern geography whose unstable disciplinary status is still very much an issue today **Progressive Architecture** ,1989

Perspectives on Garden Histories Michel Conan,1999 Garden history is a discipline of contested purposes

Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but

in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline
