each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects who in turn made a lasting impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H. H. Richardson all around us in the homes where we live, the offices where we work, our public buildings and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious and sometimes even arrogant individuals throughout history whose bold ideas have been copied far and wide. *10 Buildings* is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.
