state of cultural landscape studies today These essays by distinguished journalists historians cultural geographers architects landscape architects and planners constitute a critical evaluation of the field s theoretical assumptions and of the work of John Brinckerhoff Jackson the pivotal figure in the emergence of cultural landscape studies At the same time they present exemplary studies of twentieth century landscapes from the turn of the century American downtown to the corporate campus and the mini mall Assessing the field s accomplishments and shortcomings offering insights into teaching the subject and charting new directions for its future development Everyday America is an eloquent statement of the meaning value and potential of the close study of human environments as they embody reflect and reveal American culture *City and Regional Planning* Richard LeGates,2022-12-30 *City and Regional Planning* provides a clearly written and lavishly illustrated overview of the theory and practice of city and regional planning With material on globalization and the world city system and with examples from a number of countries the book has been written to meet the needs of readers worldwide who seek an overview of city and regional planning Chapters cover the history of cities and city and regional planning urban design and placemaking comprehensive plans planning politics and plan implementation planning visions and environmental transportation and housing planning The book pays special attention to diversity social justice and collaborative planning Topics include current practice in resilience transit oriented development complexity in planning spatial equity globalization and advances in planning methods It is aimed at U S graduate and undergraduate city and regional planning geography urban design urban studies civil engineering and other students and practitioners It includes extensive material on current practice in planning for climate change Each chapter includes a case study a biography of an important planner lists of concepts and important people and a list of books articles videos and other suggestions for further learning **Urban Space and Representation** Maria Balshaw,Liam Kennedy,1999-12-20 Theories of urban space have become the focus of a great deal of work by scholars in cultural geography urban studies and critical theory This volume contributes to that debate by analysing the relationship between theories of urban space and literary and visual representations of the city an emergent area of confluence in literary film and cultural studies The contributors address themes such as visual culture and spectacle class and capital community and public space and nation diaspora and belonging Cities covered include New York Chicago Jerusalem Paris London Birmingham and Freetown Sierra Leone Artists and writers discussed include Piet Mondrian Nella Larsen Rudolph Fisher Amos Oz David Grossman Sarah Schulman Jonathan Larsen Charles Dickens Wilkie Collins Paul Auster and Wayne Wang **Public Religion and the Urban Environment** Richard Bohannon,2012-04-26 Nature and the city have most often functioned as opposites within Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This

book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature
