Love's Enlightenment Ryan Patrick Hanley, 2017-03-30 A number of prominent moral philosophers and political theorists have recently called for a recovery of love But what do we mean when we speak of love today Love's Enlightenment examines four key conceptions of other directedness that transformed the meaning of love and helped to shape the way we understand love today Hume's theory of humanity Rousseau's theory of pity Smith's theory of sympathy and Kant's theory of love It argues that these four Enlightenment theories are united by a shared effort to develop a moral psychology that can provide both justificatory and motivational grounds for concern for others in the absence of recourse to theological or transcendental categories In this sense each theory represents an effort to redefine the love of others that used to be known as caritas or agape a redefinition that came with benefits and costs that have yet to be fully appreciated

They describe parallel evolutions within the two cultures and how innovatively these independent civilisations developed their own categories and myths to explain, exalt but also control the emotions of love and their behavioural expressions. The analyses contain rich materials for comparison, point out the universal and specific elements in each culture and hint at differences and resemblances without ignoring the peculiar beauty and attractive force of the texts cultivating love.
