How Real Is Race? Carol C. Mukhopadhyay,Yolanda T. Moses,Rosemary Henze,2025-02-24 Anthropologists have long argued that the old 19th century racial paradigm of four or five races i e Black White Asian Malay and Native American is not scientifically valid In a biological sense there are no such things as races Contemporary humans are and have always been one species with roots in Africa There are no subspecies of humans Yet this idea seems to contradict the experiences of many people in the United States and other countries where racial classification is used daily by individuals and institutions Race still matters whether in wealth accumulation educational achievement health the legal system or in personal safety How can race not be real when we experience its effects every day Mukhopadhyay Moses and Henze systematically deconstruct the myth of race as biology and address the reality of race as a cultural invention drawing on both biocultural and cross cultural perspectives In so doing they shed light on the intricate dynamic interplay among race culture and biology Part I The Fallacy of Race as Biology unravels chapter by chapter the myth that races are biologically valid divisions of humanity Part II Culture Creates Race explores in detail the concept of race as a social construction Part III Racial and Hot Button Issues takes everyday realities and uses them as a starting point for uncovering the way racial ideologies work in these settings Ready to Answer Rev.
