range of industrial activities and may work in any industry. The breadth of knowledge required by such professionals is so wide that previous books addressing plant engineering have either been limited to certain subjects or cursory in their treatment of topics. The Plant Engineer's Reference Book is the first volume to offer complete coverage of subjects of interest to the plant engineer. This reference work provides a primary source of information for the plant engineer. Subjects include selection of a suitable site for a factory and provision of basic facilities including boilers, electrical systems, water, HVAC systems, pumping systems, and floors and finishes. Detailed chapters deal with basic issues such as lubrication, corrosion, energy conservation, maintenance, and materials handling, as well as environmental considerations, insurance matters, and financial concerns. The authors chosen to contribute to the book are experts in their various fields. The Editor has experience of a wide range of operations in the UK, other European countries, the USA, and elsewhere in the world. Produced with the backing of the Institution of Plant Engineers, this work is the primary source of information for plant engineers in any industry worldwide.

**Electrical Engineer's Reference Book** G R Jones, 2013-10-22 A long established reference book, radical revision for the fifteenth edition includes complete rearrangement to take in chapters on new topics and regroup the subjects covered for easy access to information. The Electrical Engineer's Reference Book first published in 1945 maintains its original aims to reflect the state of the art in electrical science and technology and cater for the needs of practising engineers. Most chapters have been revised and many augmented so as to deal properly with both fundamental developments and new technology and applications that have come to the fore since the fourteenth edition was published 1985. Topics covered by new chapters or radically updated sections include digital and programmable electronic systems, reliability analysis, EMC, power electronics, fundamental properties of materials, optical fibres, maintenance in power systems, electroheat and welding, agriculture and horticulture, aeronautic transportation, health and safety, procurement and purchasing, engineering economics.      **The**
