The Varieties of Magical Experience Lynne L. Hume Ph.D.,Nevill Drury,2013-01-24 A rare combination of personal and academic this book showcases the myriad avenues for transcending the boundaries of reality through direct sensory experience The Varieties of Magical Experience Indigenous Medieval and Modern Magic provides a comprehensive volume that examines magic in all its aspects Through detailed case studies verbatim accounts of personal experiences and first hand experience from the authors own active participation in many alternative religious rituals and ceremonies this unique book reveals how magic can be a universal phenomenon that crosses cultural historical and spatial boundaries The work is organized in five sections that embrace several broad themes indigenous magical and shamanic practices medieval witchcraft sorcery and hermetic magic and contemporary Western magical practices including the role of sexuality trance and meditation The introductory section explores the idea of magic other realities and the employment of all the senses while the final section discusses contemporary issues of ecology and cybermagic The authors give voice to the powerful emotions and feelings that result from a magical encounter providing engaging and accessible information to general readers while those well versed in the opaque world of magic and occultism consciousness studies and imaginal and disembodied realms will appreciate the book s content at a deeper level *Journey of the Mind* Ogi Ogas,Sai Gaddam,2022-03-08 Two neuroscientists reveal why consciousness exists and how it works by examining eighteen increasingly intelligent minds from microbes to humankind and beyond Why do you exist How did atoms and molecules transform into sentient creatures that experience longing regret compassion and even marvel at their own existence What does it truly mean to have a mind to think Science has offered few answers to these existential questions until now Journey of the Mind is the first book to offer a

unified account of the mind that explains how consciousness language self awareness and civilization arose incrementally out of chaos The journey begins three billion years ago with the emergence of the universe s simplest possible mind From there the book explores the nanoscopic archaeon whose thinking machinery consists of a handful of molecules then advances through amoebas worms frogs birds monkeys and humans explaining what each new mind could do that previous minds could not Though they admire the triumph of human consciousness Ogi Ogas and Sai Gaddam argue that humans are hardly the most sophisticated minds on the planet The same physical principles that produce human self awareness are leading cities and nation states to develop superminds and perhaps planting the seeds for even higher forms of consciousness Written in lively accessible language accompanied by vivid illustrations Journey of the Mind is a mind bending work of popular science the first general book to share the cutting edge mathematical basis for consciousness language and the self It shows how a unified theory of the mind can explain the mind s greatest mysteries and offer clues about the ultimate fate of all minds in the universe

Stereoscopic Cinema and the Origins of 3-D Film, 1838-1952 Ray Zone, 2014-04-23 From stereoview cards to large format IMAX films 3 D technology s heightened realism and powerful visual allure have held audiences captive for over a century and a half The technology known as stereoscopy creates an illusion of depth by presenting two slightly different images to the eye in print or on screen The advent of stereoscopic film technology excited both filmmakers and audiences as a means of replicating all of the sounds colors movement and dimensionality of life and nature for the first time The origins of 3 D film are often linked with a proliferation of stereoscopic films in the 1950s By the time films like Man in the Dark and House of Wax was attracting large crowds however the technology behind this form of filmmaking was already over a century old Stereoscopic Cinema and the Origins of 3 D Film 1838 1952 examines this novelty period of stereoscopic film charting its progression from Charles Wheatstone s 1838 discovery of 3 D to the 1952 release of Arch Oboler s innovative film Bwana Devil Stereoscopic specialist Ray Zone argues that the development of stereoscopic film can best be understood through a historical analysis of the technology rather than of its inventors Zone examines the products used to create stereoscopic images noting such milestones as David Brewster s and Oliver Wendell Holmes s work with stereoscopes the use of polarizing image selection and the success of twin strip 3 D films among others In addition Zone looks at the films produced up to 1952 discussing public reception of early 3 D short films as well as longer features such as Power of Love in single strip anaglyphic projection in 1922 and Semyon Ivanov s 1941 autostereoscope Robinson Crusoe He integrates his examination of the evolution of 3 D film with other cinematic developments demonstrating the connection between stereoscopic motion

pictures and modern film production Stereoscopic Cinema and the Origins of 3 D Film 1838 1952 is an exhaustive study of not only the evolution of 3 D technology and the subsequent filmmaking achievements but also the public response to and cultural impact of 3 D movies Zone takes the reader on a voyage of discovery into the rich history of a field that predates photography and that continues to influence television and computer animation today

Relativistic Reality: A Modern View James D Edmonds Jr,1997-12-18 It now appears that the old argument about Lorentz vs Galileo relativity is passing into history The Lorentz symmetry may soon become obsolete itself just as the Galileo symmetry did about 1900 The tremendous successes of QED represent real progress in our quest to understand nature The answer is not to go as most outsiders but to go forward beyond to new ideas and equations that will match nature even better than QED does This book shows us a new view of relativity and quantum equations It has new equations that extend Lorentz Maxwell and Dirac

Dreams, Visions, Imaginations Jens Schröter,Tobias Nicklas,Armand Puig i Tàrrach,2021-02-08 The contributions in this volume are focused on the historical origins religious provenance and social function of ancient Jewish and Christian apocalyptic literature including so called Gnostic writings Although it is disputed whether there was a genre of apocalyptic literature it is obvious that numerous texts from ancient Judaism early Christianity and other religious milieus share a specific view of history and the world to come Many of these writings are presented in form of a heavenly divine revelation mediated through an otherworldly figure like an angel to an elected human being who discloses this revelation to his recipients in written form In different strands of early Judaism ancient Christianity as well as in Gnosticism Manichaeism and Islam apocalyptic writings played an important role from early on and were produced also in later centuries One of the most characteristic features of these texts is their specific interpretation of history based on the knowledge about the upper divine realm and the world to come Against this background the volume deals with a wide range of apocalyptic texts from different periods and various religious backgrounds
