Magic Circle Set II Language Of Dance Teaching Aids:

Ballade by Anna Sokolow Ray Cook, 2014-02-25 This volume publishes Anna Sokolow's *Ballade* in Labanotation for the first time. It is a dance which explores youth and its discoveries following the restlessness and inconclusiveness of young love to a final sombre note. The complete score is accompanied by detailed study and performance notes, historical background and photographs. Since moving to New York in 1961, Ray Cook has worked as a dancer and notator with many leading choreographers and has dedicated himself to working with Labanotation. He has directed major dance works from score, restaged many which had been considered lost, and proven through his work that Labanotation is an essential means of preserving our dance heritage. He is currently an Associate Professor of Dance at Vassar College. **Shawn's**

Fundamentals of Dance Anne Hutchinson Guest, 2014-03-18 How do conscious experience, subjectivity and free will arise from the brain and the body? Even in the late 20th century, consciousness was considered to be beyond the reach of science. Now, understanding the neural mechanisms underlying consciousness is recognized as a key objective for 21st century science. The cognitive neuroscience of consciousness is a fundamentally multidisciplinary enterprise involving powerful new combinations of functional brain imaging, computational modelling, theoretical innovation and basic neurobiology. Its progress will be marked by new insights not only into the complex brain mechanisms underlying consciousness but also by novel clinical approaches to a wide range of neurological and psychiatric disorders. These innovations are well represented by the contents of the present volume. A target article by Victor Lamme puts forward the contentious position that neural evidence should trump evidence from behaviour and introspection in any theory of consciousness. This article and its several commentaries advance one of the fundamental debates in consciousness science: namely, whether there exists non-reportable phenomenal consciousness, perhaps dependent on local rather than global neural processes. Other articles explore the wider terrain of the new science of consciousness. For example, Maniscalco and colleagues use theta burst transcranial magnetic stimulation to selectively impair metacognitive awareness. Massimini and coworkers examine changes in functional connectivity during anaesthesia, and Vanhaudenhuyse et al describe innovations in detecting residual awareness following traumatic brain injury. Together, the contents of this volume exemplify the grand challenge of consciousness in combining transformative questions about the human condition with a tractable programme of experimental and theoretical research.

Soirée Musicale Antony Tudor, Ann Hutchinson Guest, 1993 This book contains the full Labanotation score of *Soirée Musicale* with detailed study and performance notes, historical background and photographs. The first Tudor ballet to be made available in published form, Tudor's *Soirée Musicale* marks the first step towards preserving the work of this internationally celebrated choreographer who pointed the way to a deeper psychological insight into the art of ballet. *Soirée Musicale* is a charming, lively piece which is suited to classroom study and stage performance. Although technically demanding when performed to full tempo, the dances allow for a degree of personal interpretation which can surmount
