MAGNIFICENT VOYAGERS VIOLA HERMAN J,Carolyn Margolis,1985-11-17 Account of the activities chronology mapping and botanical and zoological collections of the United States Exploring Expedition of 1838 1842 which mapped 1500 miles of the Antarctic coast and proved that the continent exists Published in connection with the exhibition Magnificent Voyagers organized by the National Museum of Natural History and circulated by the Smithsonian Institution Washington D C MAGNIFICENT VOYAGERS PB Herman J. Viola,Carolyn Margolis,1985-11-17 History of the expedition that surveyed 280 islands mapped 800 miles of the Oregon coast explored the Antarctic coast and collected specimens from all parts of the globe A Great and Rising Nation Michael A. Verney,2024-05-31 A Great and Rising Nation illuminates the unexplored early decades of the United States imperialist naval aspirations Conventional wisdom holds that until the Spanish American War of 1898 the United States was a feeble player on the world stage with an international presence rooted in commerce rather than military might Michael A Verney s A Great and Rising Nation flips this notion on its head arguing that early US naval expeditions often characterized as merely scientific were in fact deeply imperialist Circling the globe from the Mediterranean to South America and the Arctic these voyages reflected the diverse imperial aspirations of the new republic including commercial dominance in the Pacific World religious empire in the Holy Land proslavery expansion in South America and diplomatic prestige in Europe As Verney makes clear the United States had global imperial aspirations far earlier than is commonly thought **American Geographics** Bruce A. Harvey,2001 This book is the first comprehensive study of antebellum depictions of the non European world Harvey proposes that U S cultural history cannot be fully understood without considering how Americans regarded tropical America the Holy Land Polynesia and Africa William Stimpson and the Golden Age of American Natural History Ronald Scott Vasile,2018-06-19 William Stimpson was at the forefront of the American natural history community in the latter half of the nineteenth century Stimpson displayed an early affinity for the sea and natural history and after completing an apprenticeship with famed naturalist Louis Agassiz he became one of the first professionally trained naturalists in the United States In 1852 twenty year old Stimpson was appointed naturalist of the United States North Pacific Exploring Expedition where he collected and classified hundreds of marine animals Upon his return he joined renowned naturalist Spencer F Baird at the Smithsonian Institution to create its department of invertebrate zoology He also founded and led the irreverent and fun loving Megatherium Club which included many notable naturalists In 1865 Stimpson focused on turning the Chicago Academy of Sciences into one of the largest and most important museums in the country Tragically the museum was destroyed in the Great Chicago Fire of 1871 and

Stimpson died of tuberculosis soon after before he could restore his scientific legacy This first ever biography of William Stimpson situates his work in the context of his time As one of few to collaborate with both Agassiz and Baird Stimpson s life provides insight into the men who shaped a generation of naturalists the last before intense specialization caused naturalists to give way to biologists Historians of science and general readers interested in biographies science and history will enjoy this compelling biography

The Wardian Case Luke Keogh, 2023-01-05 In 1829 surgeon and amateur naturalist Nathaniel Bagshaw Ward discovered that plants enclosed in airtight glass cases could survive for long periods without watering After four years of growing plants under glass in his London home Ward created traveling glazed cases that he hoped would be able to transport plants around the world After a test run from London to Sydney Ward was proven correct and the Wardian case was born It is easy to forget in our technologically advanced and globalized world but prior to the invention of the case it was extremely difficult to transfer plants around the globe as they often died from mishandling cold weather or salt from the ocean In this enthralling book Luke Keogh takes us around the world and through history with the Wardian case He shows that this revolution in the movement of plants transformed the world impacting the commercial nursery trade late nineteenth century imperialism and the global environment The repercussions of this revolution are still with us today
