Aboriginal Sign Languages of The Americas and Australia D. Umiker-Sebeok, 2013-03-09

1 THE SEMIOTIC CHARACTER OF ABORIGINAL SIGN LANGUAGES In our culture language especially in its spoken manifestation is the much vaunted hallmark of humanity the diagnostic trait of man that has made possible the creation of a civilization unknown to any other terrestrial organism Through our inheritance of a culture language is in a sense bred into man And yet language is viewed as a force which can destroy us through its potential for objectification and classification According to popular mythology the naming of the animals of Eden while giving Adam and Eve a certain power over nature also destroyed the prelinguistic harmony between them and the rest of the natural world and contributed to their eventual expulsion from paradise Later the post Babel development of diverse language families isolated man from man as well as from nature Steiner 1975 Language in other words as the central force animating human culture is both our salvation and damnation Our constant war with words Shands 1971 is waged on both internal and external battlegrounds This culturally determined ambivalence toward language is particularly apparent when we encounter humans or hominoid animals who for one reason or another must rely upon gestural forms of communication

On Semiotic Modeling Myrdene Anderson, Floyd Merrell, 2014-01-02 No detailed description available for On Semiotic Modeling

Methodology, Metaphysics and the History of Science Robert S. Cohen, Marx W. Wartofsky, 1984-09-30 This selection of papers that were presented or nearly so to the Boston Colloquium for the Philosophy of Science during the seventies fairly represents some of the most disturbing issues of scientific knowledge in these years To the distant observer it may seem that the defense of rational standards objective reference methodical self correction even the distinguishing of the foolish from the sensible and the truth seeking from the ideological has nearly collapsed In fact the defense may be seen to have shifted the knowledge business came under scrutiny decades ago and indeed from the time of Francis Bacon and

even far earlier the practicality of the discovery of knowledge was either hailed or lamented So the defense may be founded on the premise that science may yet be liberating In that case the analysis of philosophical issues expands to embrace issues of social interest and social function of instrumentality and arbitrary perspective of biological constraints upon knowledge as well as upon the species wide behavior of human beings in other relationships too of distortions due to explanatory metaphors and imposed categories and of radical comparisons among the perspectives of different civilizations Some of our contributors are frankly programmatic showing how problems must be formulated afresh how evasions must be identified and omissions rectified but they do not reach their own completion

The Social Theory of Claude Lévi-Strauss A.

Jenkins,1979-06-17 Deadhead Social Science Rebecca G. Adams,Robert Sardiello,2000-05-30 Deadhead Social Science is a collection of papers examining various aspects of the complex subculture surrounding the rock band the Grateful Dead Deadheads as Grateful Dead fans are called followed the band from venue to venue until the band announced their dissolution in December of 1995 and have continued to follow bands including various surviving members of the Grateful Dead since then Deadhead Social Science addresses the questions What is a Deadhead How does a Deadhead identity evolve Why would a person choose an identity that would be viewed negatively by a larger society Why are Deadheads viewed negatively by the larger society Is the Deadhead community a popular religion How did a rock band develop a religious following The book also examines the music the role of vendors and the reaction by host communities to the Grateful Dead and its following One key theme in Deadhead Social Science is the interconnections among teaching research and personal interests written from a variety of social science disciplinary traditions

Postmodern Postures Daniel Cordle,2017-03-02

In 1996 the physicist Alan Sokal planted a hoax article in the journal Social Text mimicking the social constructionist view of science popular in the humanities and sparked into life the science wars which had been rumbling throughout the 1990s Postmodern Postures puts this contemporary controversy into the context of earlier debates about the two cultures between F R Leavis and C P Snow and Mathew Arnold and T H Huxley Through an interrogation of interdisciplinary approaches to literature and science and a discussion of the arguments surrounding postmodern culture the book formulates a literary critical methodology for literature science criticism highlighting both the benefits and the limitations of attempts to link the two cultures Three case studies focused through the issues of knowledge identity and time put this methodology into practice showing how ideas resonate through the culture between literature and science

God in the Labyrinth Andrew

Hollingsworth,2019-10-11 In *God in the Labyrinth* Andrew Hollingsworth uses Umberto Eco s semiotic concept of the model encyclopedia as the basis for a new model and approach to systematic theology Following an in depth analysis of the model encyclopedia in Eco s semiotics he demonstrates the implications this model has for epistemology hermeneutics and doctrinal development This work aims to bridge the unfortunate gap in research that exists between the fields of systematic theology and semiotics by demonstrating semiotic insights for theological method
