McPherson, Graham F. Welch, 2012-07-11 Music education takes place in many contexts both formal and informal Be it in a school or music studio while making music with friends or family or even while travelling in a car walking through a shopping mall or watching television our myriad sonic experiences accumulate from the earliest months of life to foster our facility for making sense of the sound worlds in which we live The Oxford Handbook of Music Education offers a comprehensive overview of the many facets of musical experience behavior and development in relation to this diverse variety of contexts In this first of two volumes an international list of contributors discuss a range of key issues and concepts associated with music learning and teaching The volume then focuses on these processes as they take place during childhood from infancy through adolescence and primarily in the school age years Exploring how children across the globe learn and make music and the skills and attributes gained when they do so these chapters examine the means through which music educators can best meet young people s musical needs The second volume of the set brings the exploration beyond the classroom and into later life Whether they are used individually or in tandem the two volumes of The Oxford Handbook of Music Education update and redefine the discipline and show how individuals across the world learn enjoy and share the power and uniqueness of music *The Oxford Handbook of Philosophical and Qualitative Assessment in Music Education* David James Elliott, Marissa Silverman, Gary McPherson, 2019 The Oxford Handbook of Philosophical and Qualitative Assessment in Music Education offers critical perspectives on a wide range of conceptual and practical issues in music education assessment and evaluation as these apply to music education in schools and community settings **Choral Music** Avery T. Experiencing 'Flow' in Jazz Performance Elina Hytönen-Ng, 2016-04-22 The term flow refers to experiences where the musician moves into a consciousness in which time seems to be suspended and perception of reality is blurred by unconscious forces An essential part of the jazz tradition which often serves as the foundation of the musician s identity flow is recognised within the greater jazz community as a critical factor in accomplished musicianship Flow as a concept is so

deeply embedded in the scene that these experiences are not generally discussed. It contributes to the musicians' work motivation providing a vital level of satisfaction and accomplishment. The power of the experience consciously or unconsciously has given rise to the creation of heroic images in which jazz musicians are seen as being bold yet vulnerable, strong and masculine but still capable of expressing emotions. In this discourse musicians are pictured as people constantly putting themselves on the line, exposing themselves and their hearts to one another as well as to the audience. Heroic profiles are richly constructed within the jazz scene and their incorporation into narratives of flow suggests that such images are inseparable from jazz. It is thus unclear how far the musicians are simply reporting personal experience as opposed to unconsciously perpetuating a profoundly internalised mythology.

Drawing on eighteen interviews conducted with professional jazz musicians from around the world, Elina Hytönen and Ng examines the fundamentals of the phenomenon of flow in jazz that has led to this genre's popularity. Furthermore, she draws on how flow experiences are viewed and constructed by jazz musicians, the meanings they attach to it and the quality of music that it inspires.
