SYMBOLISM

Materials can be used symbolically. Gold, for example, is a sign that represents wealth and adds an extra layer of meaning to an artwork.

SAFETY

Materials may be hazardous. They need to be stored securely, handled carefully and disposed of following environmental protocols

TECHNIQUES

Techniques are ways an artist selects and uses their skill to apply and manipulate materials with tools and equipment. Artists may choose to use traditional art-making techniques, following established conventions or experiment, hoping to discover new effects.

Examples of techniques used for painting are; dry brush, impasto and wash.

Examples of techniques used for sculpture are; carving, casting and assembly.

Techniques can be expressive or restrained. An artist's use of techniques is central to their style. Techniques are the activity of art making.

PROCESSES

Making an artwork may involve many steps. The term **process** refers to a series of steps or activities. Some processes can be quite simple and linear. For example, an oil painting may require the preparation of a canvas, sketching, under-painting, washes, impasto painting and finally, the application of varnish. By contrast, artists also use complex processes. Artists sometimes switch between two and three-dimensional work, **construction** and **deconstruction** and re-assembly of components into totally new forms.

Artists may work alone, in collaboration with others or employ additional people for parts or all of the production of their artwork.

An artist may desire that the process of their art-making is **evident** in the completed artwork. They may leave clues that show the viewer how the artwork has been made. Alternatively, an artist may make their process **invisible**, revealing only the final, polished surface to the viewer. These different aesthetic qualities create the artist's **style** and reflect the **intention** and the **ideas** expressed in the artwork.
