Sex Panic and the Punitive State Roger N. Lancaster, 2011-03-15 One evening while watching the news Roger N Lancaster was startled by a report that a friend a gay male school teacher had been arrested for a sexually based crime The resulting hysteria threatened to ruin the life of an innocent man In this passionate and provocative book Lancaster blends astute analysis robust polemic ethnography and personal narrative to delve into the complicated relationship between sexuality and punishment in our society Drawing on classical social science critical legal studies and queer theory he tracks the rise of a modern suburban culture of fear and develops new insights into the punitive logic that has put down deep roots in everyday American life Governing Through Crime Jonathan Simon, 2007-02-03 Across America today gated communities sprawl out from urban centers employers enforce mandatory drug testing and schools screen students with

metal detectors Social problems ranging from welfare dependency to educational inequality have been reconceptualized as crimes with an attendant focus on assigning fault and imposing consequences Even before the recent terrorist attacks non citizen residents had become subject to an increasingly harsh regime of detention and deportation and prospective employees subjected to background checks How and when did our everyday world become dominated by fear every citizen treated as a potential criminal In this startlingly original work Jonathan Simon traces this pattern back to the collapse of the New Deal approach to governing during the 1960s when declining confidence in expert guided government policies sent political leaders searching for new models of governance The War on Crime offered a ready solution to their problem politicians set agendas by drawing analogies to crime and redefined the ideal citizen as a crime victim one whose vulnerabilities opened the door to overweening government intervention By the 1980s this transformation of the core powers of government had spilled over into the institutions that govern daily life Soon our schools our families our workplaces and our residential communities were being governed through crime This powerful work concludes with a call for passive citizens to become engaged partners in the management of risk and the treatment of social ills Only by coming together to produce security can we free ourselves from a logic of domination by others and from the fear that currently rules our everyday life

We Believe the Children Richard Beck, 2015-08-04 A brilliant disturbing portrait of the dawn of the culture wars when America started to tear itself apart with doubts wild allegations and an unfounded fear for the safety of children During the 1980s in California New Jersey New York Michigan Massachusetts Florida Tennessee Texas Ohio and elsewhere day care workers were arrested charged tried and convicted of committing horrible sexual crimes against the children they cared for These crimes social workers and prosecutors said had gone undetected for years and they consisted of a brutality and sadism that defied all imagining The dangers of babysitting services and day care centers became a national news media fixation Of the many hundreds of people who were investigated in connection with day care and ritual abuse cases around the country some 190 were formally charged with crimes leading to more than 80 convictions It would take years for people to realize what the defendants had said all along that these prosecutions were the product of a decade long outbreak of collective hysteria on par with the Salem witch trials Social workers and detectives employed coercive interviewing techniques that led children to tell them what they wanted to hear Local and national journalists fanned the flames by promoting the stories salacious aspects while aggressive prosecutors sought to make their careers by unearthing an unspeakable evil where parents feared it most Using extensive archival research and drawing on dozens of interviews conducted with the hysteria s major figures n 1 editor Richard Beck shows how a group of legislators doctors lawyers and parents most working with the best of intentions set the stage for a cultural disaster The climate of fear that surrounded these cases influenced a whole series of arguments about women children and sex It also drove a right wing cultural resurgence that in many respects continues to this day
