

What is **Anthropology**?

Anthropology is a multidisciplinary field of study that explores the origins, development, and diversity of human beings and their societies.

It encompasses various subfields including *cultural anthropology*, which examines the beliefs, practices, and social structures of different cultures; *archaeology*, which investigates past human societies through material remains; and *linguistic anthropology*, which studies the role of language in human societies.

Anthropologists use diverse methods such as ethnography, excavation, and comparative analysis to understand the complexity of human culture and biology.

The Translation of Culture T. O. Beidelman, 2013-11-05 Tavistock Press was established as a co operative venture between the Tavistock Institute and Routledge Kegan Paul RKP in the 1950s to produce a series of major contributions across the social sciences This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print or are difficult to locate Published by Routledge 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library Classics from the Tavistock Press Reproduced here in facsimile this volume was originally published in 1971 and is available individually The collection is also available in a number of themed mini sets of between 5 and 13 volumes or as a complete collection The Institutional Dynamics of Culture, Volumes I and II Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences

Problems of a Sociology of Knowledge (Routledge Revivals) Max Scheler, 2012-11-12 First Published in 1980 Manfred S Frings translation of Problems of a Sociology of Knowledge makes available Max Scheler s important work in sociological theory to the English speaking world The book presents the thinker s views on man s condition in the twentieth century and places it in a broader context of human history This book highlights Scheler as a visionary thinker of great intellectual strength who defied the pessimism that many of his peers could not avoid He comments on the isolated fragmented nature of man s existence in society in the twentieth century but suggests that a World Age of Adjustment is on the brink of existence Scheler argues that the approaching era is a time for the disjointed society of the twentieth century to heal its fractures and a time for different forms of human knowledge to come together in global understanding The Publishers Weekly ,1923

Dictionary of World Philosophy A. Pablo Iannone, 2013-04-15 The Dictionary of World Philosophy covers the diverse and challenging terminology concepts schools and traditions of the vast field of world philosophy Providing an extremely comprehensive resource and an essential point of reference in a complex and expanding field of study the Dictionary covers all major subfields of the discipline Key features Cross references are used to highlight interconnections and the cross cultural diffusion and adaptation of terms which has taken place over time The user is led from specific terms to master entries which provide valuable historical and cultural context Each master entry is followed by at least two suggestions for further reading on the subject creating a substantial bibliography of world philosophy References extend beyond philosophy

to related areas such as cognitive science computer science language and physics Subdisciplines covered include aesthetics ethics sociopolitical philosophy the philosophy of law epistemology logic the philosophy of science the philosophy of mind the philosophy of culture and history metaphysics the philosophy of religion Entries are drawn from West Africa Arabic Chinese Indian Japanese Jewish Korean Latin American Maori and Native American philosophy including the important and so far largely neglected instance of Pre Hispanic thought Nahua philosophy

Doing Fieldwork Robert A. Rubinstein, 2017-07-12

Prior to the 1930s the highlands of Guatemala were largely undescribed except in travelogues Just two decades later the highlands had become one of the most anthropologically well investigated areas of the world This is largely due to the research that Robert Redfield and Sol Tax carried out between 1934 and 1941 Separately and together Redfield and Tax anticipated and guided anthropological investigations of people living in peasant and urban communities in other areas of the world Their work helped to define the major outlines of research in the 1970s and since then much writing about the region has been formulated in critical response to the Redfield Tax program Not coincidentally since the mid 1970s anthropology has been caught up in a wave of self doubt about the status of fieldwork and the authority of ethnographic description This critical stance has often cast ethnography as a creative literary enterprise This volume presents a timely view of the process of ethnography as carried out by two of its early practitioners Containing a wealth of ethnographic detail the book reveals how Redfield and Tax developed and tested ethnological hypotheses and it allows us to follow the development of their major theoretical statements The result is an exceptionally clear picture of the process of ethnography Redfield and Tax emerge as rigorous and sensitive observers of social life whose observations bear importantly on contemporary understandings of the ethnology of Guatemala and the enterprise of anthropology This book will be of interest to students of method and theory in ethnography Latin Americanists and other professionals interested in the history of idea

Means of Exchange Dagfinn Skre, 2008-12-31

This second volume based on the excavations of the Viking town Kaupang 2000 2003 presents find types used in economic transactions coins hacksilver ingots weights and balances Changes in type and volume of economic transactions at Kaupang and in Scandinavia are discussed and the economic mentality of Viking crafts and tradesmen is explored Earlier the study of Viking silver currency was based mainly on hoards containing coins and hacksilver In this volume the combined study of the find types mentioned as well as the sophisticated chronology of settlements finds from sites like Kaupang gives a completely new insight into economy and exchange In the early 9th century silver and goods seem to have come to Kaupang mainly from the Carolingian world Silver weighed with locally produced lead weights was used as currency on a limited scale The old e unit was easily convertible to Carolingian units After the mid 9th century this early system was altered The increased availability of silver caused by the import of Islamic coins as well as the introduction in most of Scandinavia in the 860s 870s of standardized weights of probable Islamic origin paved the way from then on for an increasing use of silver as payment These studies demonstrate that sites like Kaupang led the way in economic development

in Scandinavia The urban environment promoted an economic mentality which contributed significantly to the fundamental transformation of Scandinavian culture and society which culminated in the region s integration in Christian Europe in the High Middle Ages Fulani Pastoralism Moses O. Awogbade,1983 **Culture and Context in World Politics** Stephanie Lawson,2006-09-05 This wide ranging historically informed study examines the career of the culture concept and related notions of context in comparative and international politics tracing connections through the disciplines of anthropology and history as well as through issues in nationalism and democracy *Directions* ,1975
