Henry,1993 Written in an accessible style Henry s work places Texas architecture in the wider context of American architectural history by tracing the development of building in the state from late Victorian styles and the rise of neoclassicism to the advent of the International Style His work provides a welter of new facts both about the era s buildings and the architects who designed them and he has catalogued and described most of the important landmarks of the period Southwestern Historical Quarterly a significant contribution to the study of Texas architecture Drury Blakeley Alexander author of Texas Homes of the Nineteenth Century Texas architecture of the twentieth century encompasses a wide range of building styles from an internationally inspired modernism to the Spanish Colonial Revival that recalls Texas earliest European heritage This book is the first comprehensive survey of Texas architecture of the first half of the twentieth century More than just a catalog of buildings and styles the book is a social history of Texas architecture Jay C Henry discusses and illustrates buildings from around the state drawing a majority of his examples from the ten to twelve largest cities and from the work of major architects and firms including C H Page and Brother Trost and Trost Lang and Witchell Sanguinet and Staats Atlee B and Robert M Ayres David Williams and O Neil Ford The majority of buildings he considers are public ones but a separate chapter traces the evolution of private housing from late Victorian styles through the regional and international modernism of the 1930s Nearly 400 black and white photographs complement the text Written to be accessible to general readers interested in architecture as well as to architectural professionals this work shows how Texas both participated in and differed from prevailing American architectural traditions *Tennessee's New Deal Landscape* Carroll Van West,2001 The indelible stamp of the New Deal can be seen across American in the public works projects that modernized the country even as they provided employment during the Great Depression Tennessee in particular benefited from the surge in federal construction The New Deal not only left the state with many public buildings and schools that are still in active use but is conservation and reclamation efforts also changed the lives of Tennesseans for generations to come In Tennessee s New Deal Landscape Carroll Van West examines over 250 historic sites created from 1933 to 1942 courthouses post offices community buildings schools and museums along

with the Great Smoky Mountains National Park the Cherokee National Forest and the dams and reservoirs of the Tennessee Valley Authority He describes the significant and impact of each project and provides maps to guide readers to the sites described West discusses architectural styles that are often difficult to identify and his lively narrative points out some of the paradoxes of New Deal projects such as the proliferation of leisure parks during the nation's darkest hours In highlighting these projects he shows that Tennessee owes much not only to TVA but also to many other agencies and individuals who left their mark on the landscape through roads levees and reforested hillsides as well as buildings An invaluable resource for travelers as well as scholars this book reveals a legacy of historic treasures that are well worth preserving The Author Carroll Van West is projects manager for the Center of Historic Preservation at Middle Tennessee State University The author of Tennessee's Historic Landscapes he most recently edited the volumes Tennessee History The Land the People and the Culture and the Tennessee Encyclopedia of History and Culture He is also senior editor of the Tennessee Historic Quarterly
