Ministers And Ministries A Functional Analysis:

Ministers and Ministries Richard Rose,1987 Focusing on the crucial link between ministers and ministries in the British government this book includes comparisons of the historical evolution and internal organization of the Scottish Welsh and North Irish Offices *Cabinet Ministers and Parliamentary Government* Michael Laver,Kenneth A. Shepsle,1994-09-30 A close examination of the constitutional relationship between legislature and executive in parliamentary regimes

Ministers and Parliament Diana Woodhouse,1994 Examines the divergence between theory and practice The author analyses the situations in which ministers resign the effectiveness of resignation as a means of accountability and the abdication by ministers of responsibility She also examines the powers and limitations of Select Committees *Accounting for Ministers* Samuel Berlinski,Torun Dewan,Keith Dowding,2012-03-15 Uses the tools of modern political science to analyse the factors which determine the fortunes of Cabinet ministers **The Oxford Handbook of Political Executives** Rudy B. Andeweg,Robert Elgie,Ludger Helms,Juliet Kaarbo,Ferdinand Müller-Rommel,2020-07-30 Political executives have been at the centre of public and scholarly attention long before the inception of modern political science In the contemporary world political executives have come to dominate the political stage in many democratic and autocratic regimes The Oxford Handbook of Political Executives marks the definitive reference work in this field Edited and written by a team of world class scholars it combines substantive stocktaking with setting new agendas for the next generation of political executive research

Ministers of the Crown Rodney Brazier,1997 In the first work of its kind Brazier successfully tackles the Herculean task of describing and evaluating contemporary Ministerial life and how it is affected by the law constitutional convention and political practice Ministers of the Crown provides a detailed and concise description of the legal and political position of Ministers and of their work within the contemporary British governmental system It covers the daily work of Ministers in their departments and collectively in government their benefits and pay as well as how politicians prepare themselves for office and the legal and other qualifications which are required for appointment Detailed coverage is given to Ministers as legislators how Ministers are required to exercise their legal powers and the position of Ministers as plaintiffs and defendants Finally the loss of office and its consequences is considered As a detailed assessment of Ministerial life this book is invaluable but Brazier's capacity to bring the Ministerial world to life using a wealth of contemporary and fascinating detail transforms a potentially dry subject Ministerial Leadership Leighton Andrews,2024-01-16 Ministerial Leadership offers a practice based account of how ministers in UK governments perform their roles and exercise leadership in their spaces of activity Drawing on the unique Ministers Reflect archive of the Institute for Government which is an open and growing resource of over 140 ministerial interviews at UK and devolved government levels as well as other ministerial reflections the book addresses the literature on ministerial life and political leadership and develops new concepts for examining ministerial leadership in different spheres It argues that the relationship between ministers and civil servants has

changed significantly in recent decades as ministers place greater emphasis on delivery and implementation The book adopts a theoretically pluralist approach with the intention of offering a valuable teaching aid for existing and new courses It will appeal to all those interested in public policy and governance *The State of the Nations 2008* Alan Trench, 2017-05-24 The State of the Nations 2008 Into the third term of devolution in the United Kingdom is the sixth publication of a major research programme into devolution in the United Kingdom published on behalf of the Constitution Unit at University College London The focus of this volume is on the devolved elections of May 2007 analyzing the outcome in terms of both the immediate aftermath and longer term implications In particular it will consider influences on policy making finance the UK Parliament and the resolution of intergovernmental disputes This book replaces the previously announced volume *The State of the Nations 2007* **Beyond Networks - Interlocutory Coalitions, the European and Global Legal Orders** Gianluca Sgueo, 2016-04-06 This book explores the activism promoted by organised networks of civil society actors in opening up possibilities for more democratic supranational governance It examines the positive and negative impact that such networks of civil society actors named interlocutory coalitions may have on the convergence of principles of administrative governance across the European legal system and other supranational legal systems The book takes two main controversial aspects into account the first relates to the convergence between administrative rules pertaining to different supranational regulatory systems Traditionally the spread of methods of administrative governance has been depicted primarily against the background of the interactions between the domestic and the supranational arena both from a top down and bottom up perspective However the exploration of interactions occurring at the supranational level between legal regimes is still not grounded on adequate empirical evidence The second controversial aspect considered in this book consists of the role of civil society actors operating at the supranational level In its discussion of the first aspect the book focuses on the relations between the European administrative law and the administrative principles of law pertaining to other supranational regulatory regimes and regulators including the World Bank the International Monetary Fund the World Trade Organization the United Nations the Organization for Economic Cooperation and Development the Asian Development Bank and the Council of Europe The examination of the second aspect involves the exploration of the still little examined but crucial role of civil society organised networks in shaping global administrative law These interlocutory coalitions include NGOs think tanks foundations universities and occasionally activists with no formal connections to civil society organisations The book describes such interlocutory coalitions as drivers of harmonized principles of participatory democracy at the European and global levels However interlocutory coalitions show a number of tensions e g the governability of coalitions the competition among them that may hamper the impact they have on the reconfiguration of individuals rights entitlements and responsibilities in the global arena **Women and Power in Parliamentary Democracies** Rebecca Howard Davis, 1997-01-01 Margaret Thatcher Mary Robinson Gro Harlem Brundtland Edith Cresson and Simone Veil these

contemporary world leaders are as noteworthy for their gender as they are for the political directions they have provided. Indeed, female government leaders are so rare as to be almost an intellectual curiosity. Why is this the case? Why do women, who make up more than half of the world's population, occupy so few positions at the highest levels of political power? Why are women making inroads in government in some countries while not in others? And what difference does women's presence or absence make in terms of policy outcomes? Davis addresses these questions by examining women's access to power through appointive channels in Western European parliamentary and parliamentary type systems. Tracing women's participation from 1968 to 1992 in fifteen countries, she accounts for the variation from high levels of women's representation in Norway and Sweden to low levels in Italy and Britain. Little research on women and elections extends beyond the United States and Britain. Even less exists on women's access to power through appointive channels. By comparatively examining the elite recruitment of women through appointments, this work fills a critical gap.

Prime Minister, Cabinet and Core Executive Patrick Dunleavy, R.A.W. Rhodes, 1995-08-14. This new reader is designed to break the mould of core executive studies by broadening the focus of analysis from the conventional concentration on the relative power of Prime Minister and Cabinet to assess the whole battery of mechanisms which co-ordinate policy and manage conflict. It brings together chapters introducing new theoretical perspectives and assessing the changes in executive structure and decision making from Wilson to Thatcher with in-depth case studies of the executive in action.

The Future of Governing B. Guy Peters, 2001. Examines and compares various forms of government in industrialized countries.

Delegation and Accountability in Parliamentary Democracies Kaare Strøm, Torbjörn Bergman, Wolfgang C. Müller, 2006-01-19. Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics. The General Editors are Max Kaase, Professor of Political Science, Vice President and Dean, School of Humanities and Social Science, International University Bremen, Germany, and Kenneth Newton, Professor of Comparative Politics, University of Southampton. The series is published in association with the European Consortium for Political Research. Today, parliamentarism is the most common form of democratic government. Yet knowledge of this regime type has been incomplete and often unsystematic. *Delegation and Accountability in Parliamentary Democracies* offers new conceptual clarity on the topic. This book argues that representative democracies can be understood as chains of delegation and accountability between citizens and politicians. Under parliamentary democracy, this chain of delegation is simple but also long and indirect. Principal agent theory helps us to understand the perils of democratic delegation, which include the problems of adverse selection and moral hazard. Citizens in democratic states therefore need institutional mechanisms by which they can control their representatives. The most important such control mechanisms are on the one hand political parties and on the other external constraints such as courts, central banks, referendums, and supranational institutions such as those of the European Union. Traditionally, parliamentary democracies have relied heavily on political parties and presidential systems more on external constraints. This new empirical

investigation includes all seventeen West European parliamentary democracies. These countries are compared in a series of cross national tables and figures and seventeen country chapters provide a wealth of information on four discrete stages in the delegation process: delegation from voters to parliamentary representatives; delegation from parliament to the prime minister and cabinet; delegation within the cabinet; and delegation from cabinet ministers to civil servants. Each chapter illustrates how political parties serve as bonding instruments which align incentives and permit citizen control of the policy process. This is complemented by a consideration of external constraints. The concluding chapters go on to consider how well the problems of delegation and accountability are solved in these countries. They show that political systems with cohesive and competitive parties and strong mechanisms of external constraint solve their democratic agency problems better than countries with weaker control mechanisms. But in many countries political parties are now weakening and parliamentary systems face new democratic challenges. *Delegation and Accountability in Parliamentary Democracies* provides an unprecedented guide to contemporary European parliamentary democracies. As democratic governance is transformed at the dawn of the twenty first century it illustrates the important challenges faced by the parliamentary democracies of Western Europe.

Governing Together Jean Blondel, Ferdinand Müller-Rommel, 2016-07-27 Parliamentary cabinets are supposed to be collective bodies taking their decisions on the basis of agreements among all the members. Yet much has been made of the growth of the role of prime ministers not just in Britain but all over western Europe. Much has also been made of the trend towards letting cabinet decisions be taken by committees or even by individual ministers. It is indeed true that twenty men and women meeting only a few hours a week cannot take all the decisions of the State. These are the issues which this study examines on the basis of the replies of over 400 cabinet ministers across western Europe. The result is the first truly empirical analysis in a subject on which what has been known so far has tended to be speculation.

Governance Stories Mark Bevir, Rod Rhodes, 2006-04-19 An incisive examination of Britain today which breaks from traditional studies and takes a new approach to account for massive changes in the make up of the nation. Over the last twenty years Britain has changed from being governed as a unitary state to a country ruled by the interplay of various forces: central government, the market, public private partnerships, new local government structures eg the new Mayoral system, greater regional autonomy as well as the EU and transnational businesses and organizations. In their earlier book *Interpreting British Governance* Bevir and Rhodes examined changes in British government by setting out an interpretative approach to British political science which focussed on an aggregate analysis of British political traditions. This new study builds on this work to provide a theoretical defence of situated agency located in the historical context of British political science, compare their approach to British political science with others including post structural and institutional analysis, present a general account of governance as the context for ethnographic analyses of governance in action, deliver studies of the consumers of public services: the National Health Service, government departments and policy networks. This book will be of great interest to advanced students and

researchers of political theory public policy British politics and British history *Modern Italy* Paul Furlong,2003-09-02 Paul Furlong presents an introduction to Italian politics and policy making considering in detail the way in which Italy's recent history has affected its course of political and economic development He looks at the policy process through the 1980s analysing the practical results of the policy making process in key areas such as industry and the economy He goes on to discuss the party political and governmental developments of the 1990s The book is designed throughout to illuminate the Italian case by applying a comparative framework Italy has often been treated as an exception to any rule of Western European politics there are however many features that the country holds in common with its EC neighbours Top Policy Makers in India Kuldeep Mathur,James Warner Bjorkman,1994 Study covers the period 1967-1989 **Political Issues in Britain Today** Bill Jones,1999-06-12 British politics has been revolutionized in the past ten years by two major factors the hegemony of Thatcherism for eighteen years and the current dominance of what some say is variant Blairism forged in opposition and enthroned in government since May 1997 This volume addresses key political issues which occupy the government and opposition including Blair's style of government the philosophy of the welfare state and the question of its reform policy making in the oppressed local government sector law and order reform of the voting system the effect of EU membership on British politics the much criticized monarchy privatization the environment education standards in public life the politics of the health service and the usefulness of the House of Lords **Information Studies**,2003 *Network Governance and the Differentiated Polity* R. A. W. Rhodes,2017-06-30 *Network Governance and the Differentiated Polity* is the first of two volumes featuring a selection of key writings by R A W Rhodes Volume I collects in one place for the first time the main articles written by Rhodes on policy networks and governance between 1990 and 2005 The introductory section provides a short biography of the author's journey Part I focuses on policy networks and Part II focuses on governance The conclusion provides critical commentary both replying to critics and reflecting on theoretical developments since publication The volume complements the author's other publications on networks and governance and many chapters in the volume feature an afterword setting out the context in which it was written and identifying what has changed empirically Volume II looks forward and explores the interpretive turn and its implications for the craft of political science especially public administration
