**The History of Black Business in America** Juliet E. K. Walker, 2009 In this wide ranging study Stephen Foster explores Puritanism in England and America from its roots in the Elizabethan era to the end of the seventeenth century Focusing on Puritanism as a cultural and political phenomenon as well as a religious movement Foster addresses parallel developments on both sides of the Atlantic and firmly embeds New England Puritanism within its English context He provides not only an elaborate critique of current interpretations of Puritan ideology but also an original and insightful portrayal of its dynamism According to Foster Puritanism represented a loose and incomplete alliance of progressive Protestants lay and clerical aristocratic and humble who never decided whether they were the vanguard or the remnant Indeed in Foster's analysis changes in New England Puritanism after the first decades of settlement did not indicate secularization and decline but instead were part of a pattern of change conflict and accommodation that had begun in England He views the Puritans' own claims of declension as partisan propositions in an internal controversy as old as the Puritan movement itself The result of these stresses and adaptations he argues was continued vitality in American Puritanism during the second half of the seventeenth century Foster draws insights from a broad range of sources in England and America including sermons diaries spiritual autobiographies and colony town and court records Moreover his presentation of the history of the English and American Puritan movements in tandem brings out the fatal flaws of the former as well as the modest but essential strengths of the latter

*African American Urban History since World War II* Kenneth L. Kusmer, Joe W. Trotter, 2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period especially compared with earlier decades Correcting this imbalance *African American Urban History since World War II* features an exciting mix of seasoned scholars and fresh new voices

whose combined efforts provide the first comprehensive assessment of this important subject The first of this volume's five groundbreaking sections focuses on black migration and Latino immigration examining tensions and alliances that emerged between African Americans and other groups Exploring the challenges of residential segregation and deindustrialization later sections tackle such topics as the real estate industry's discriminatory practices the movement of middle class blacks to the suburbs and the influence of black urban activists on national employment and social welfare policies Another group of contributors examines these themes through the lens of gender chronicling deindustrialization's disproportionate impact on women and women's leading roles in movements for social change Concluding with a set of essays on black culture and consumption this volume fully realizes its goal of linking local transformations with the national and global processes that affect urban class and race relations

Uninvited Neighbors Herbert G. Ruffin, 2014-03-28 In the late 1960s African American protests and Black Power demonstrations in California's Santa Clara County including what's now called Silicon Valley took many observers by surprise After all as far back as the 1890s the California constitution had legally abolished most forms of racial discrimination and subsequent legal reform had surely taken care of the rest White Americans might even have wondered where the black activists in the late sixties were coming from because beginning with the writings of Frederick Jackson Turner the most influential histories of the American West simply left out African Americans or later portrayed them as a passive and insignificant presence *Uninvited Neighbors* puts black people back into the picture and dispels cherished myths about California's racial history Reaching from the Spanish era to the valley's emergence as a center of the high tech industry this is the first comprehensive history of the African American experience in the Santa Clara Valley Author Herbert G Ruffin II's study presents the black experience in a new way with a focus on how despite their smaller numbers and obscure presence African Americans in the South Bay forged communities that had a regional and national impact disproportionate to their population As the region industrialized and spawned suburbs during and after World War II its black citizens built institutions such as churches social clubs and civil rights organizations and challenged socioeconomic restrictions Ruffin explores the quest of the area's black people for the postwar American Dream The book also addresses the scattering of the black community during the region's late yet rapid urban growth after 1950 which led to the creation of several distinct black suburban communities clustered in metropolitan San Jose Ruffin treats people of color as agents of their own development and survival in a region that was always multiracial and where slavery and Jim Crow did not predominate but where the white embrace of racial justice and equality was often insincere The result offers a new view of the intersection of African American history and the history of the American West

Theatre History Studies 2015, Vol. 34 Elizabeth Reitz Mullenix, 2015-12-31 The 2015 volume of *Theatre History Studies* presents a collection of five critical essays examining the intersection of theatre studies and historiography as well as twenty five book reviews highlighting recent scholarship in this

thriving field      African American: Readings in History and Identity Al Smith, 2000      Black History Debra Newman Ham, 1984      **Long Is the Way and Hard** Kevern Verney, Lee Sartain, Adam Fairclough, 2009-11

Celebrating its one hundredth anniversary in February 2009 the National Association for the Advancement of Colored People NAACP has been the leading and best known African American civil rights organization in the United States. It has played a major and at times decisive role in most of the important developments in the twentieth century civil rights struggle. Drawing on original and previously unpublished scholarship from leading researchers in the United States, Britain, and Europe, this important collection of sixteen original essays offers new and invaluable insights into the work and achievements of the association. The first part of the book offers challenging reappraisals of two of the NAACP's best known national spokespersons, Walter White and Roy Wilkins. Other essays analyze the association's cultural initiatives and the key role played by its public relations campaigns in the mid 1950s to counter segregationist propaganda and win over the hearts and minds of American public opinion in the wake of the NAACP's landmark legal victory in *Brown v Board of Education*. Others provide thought provoking accounts of the association's complex and difficult relationship with Martin Luther King, the post World War II Civil Rights movement, and Black Power radicals of the 1960s. The second part of the collection focuses on the work of the NAACP at state, city, and local levels, examining its grassroots organization throughout the nation, from Chicago, Cleveland, and Detroit in the North to California in the West, as well as states across the South including Virginia, Arkansas, Alabama, Louisiana, and Texas. Providing detailed and fascinating information on hitherto little explored aspects of the association's work, these studies complement the previous essays by demonstrating the impact national initiatives had on local activists and analyzing the often strained relations between the NAACP national office in New York and its regional branches.
