Brundage, 2024-05-31 In the aftermath of sixth century barbarian invasions the legal profession that had grown and flourished during the Roman Empire vanished Nonetheless professional lawyers suddenly reappeared in Western Europe seven hundred years later during the 1230s when church councils and public authorities began to impose a body of ethical obligations on those who practiced law James Brundage's *The Medieval Origins of the Legal Profession* traces the history of legal practice from its genesis in ancient Rome to its rebirth in the early Middle Ages and eventual resurgence in the courts of the medieval church By the end of the eleventh century Brundage argues renewed interest in Roman law combined with the rise of canon law of the Western church to trigger a series of consolidations in the profession New legal procedures emerged and formal training for proctors and advocates became necessary in order to practice law in the reorganized church courts Brundage demonstrates that many features that characterize legal advocacy today were already in place by 1250 as lawyers trained in Roman and canon law became professionals in every sense of the term A sweeping examination of the centuries long power struggle between local courts and the Christian church secular rule and religious edict *The Medieval Origins of the Legal Profession* will be a resource for the professional and the student alike **Historical Atlases** Walter Goffart, 2011-04-15 Today we can walk into any well stocked bookstore or library and find an array of historical atlases The first thorough review of the source material *Historical Atlases* traces how these collections of maps for history maps whose

sole purpose was to illustrate some historical moment or scene came into being Beginning in the sixteenth century and continuing down to the late nineteenth Walter Goffart discusses milestones in the origins of historical atlases as well as individual maps illustrating historical events in alternating paired chapters He focuses on maps of the medieval period because the development of maps for history hinged particularly on portrayals of this segment of the postclassical modern past Goffart concludes the book with a detailed catalogue of more than 700 historical maps and atlases produced from 1570 to 1870 Historical Atlases will immediately take its place as the single most important reference on its subject Historians of cartography medievalists and anyone seriously interested in the role of maps in portraying history will find it invaluable

Pragmatic Utopias Rosemary Horrox, Sarah Rees Jones, 2001-11-29 This collection of essays was presented to Barrie Dobson in celebration of his 70th birthday It will be welcomed by all scholars of pre modern religion and society Spanning the artificial divide between medieval and early modern the contributors all acknowledged experts in their field pursue the ways in which men and women tried to put their ideals into practice sometimes alone but more commonly in the shared environment of cloister college or city The range of topics is testimony to the breadth of Barrie Dobson's own interests but even more striking are the continuities and shared assumptions across time and between the dissident and the impeccably orthodox Taking the reader from a rural anchor hold to the London of Thomas More and from the greenwood of Robin Hood to the central law courts this collection builds into a richly satisfying exploration of the search for perfection in an imperfect world

Violence in Late Antiquity H.A. Drake, 2016-12-05 Violence is virtually synonymous in the popular imagination with the period of the Later Roman Empire a time when waves of barbarian invaders combined with urban mobs and religious zealots to bring an end to centuries of peace and serenity All of these images come together in the Visigothic sack of the city of Rome in A D 410 a date commonly used for the fall of the entire empire But was this period in fact as violent as it has been portrayed A new generation of scholars in the field of Late Antiquity has called into question the standard narrative pointing to evidence of cultural continuity and peaceful interaction between barbarians and Romans Christians and pagans To assess the state of this question the fifth biennial Shifting Frontiers conference was devoted to the theme of Violence in Late Antiquity Conferees addressed aspects of this question from standpoints as diverse as archaeology and rhetoric anthropology and economics A selection of the papers then delivered have been prepared for the present volume along with others commissioned for the purpose and a concluding essay by Martin Zimmerman reflecting on the theme of the book The four sections on Defining Violence Legitimate Violence Violence and Rhetoric and Religious Violence are each introduced by a theme essay from a leading scholar in the field While offering no definitive answer to the question of violence in Late Antiquity the papers in this volume aim to stimulate a fresh look at this age old problem

Rome and the Barbarians, 100 B.C.-A.D. 400 Thomas S. Burns, 2009-07-06 This historical analysis of Roman Barbarian relations from the Republic into late antiquity offers a striking new perspective on the fall of the Empire The barbarians of antiquity often portrayed simply as the savages who destroyed Rome emerge in this colorful richly textured history as a much more complex factor in the expansion and eventual unmaking of the Roman Empire Thomas S Burns marshals an abundance of archeological and literary evidence to bring forth a detailed and wide ranging account of the relations between Romans and non Romans along the frontiers of western Europe Looking at a 500 year time span beginning with early encounters between barbarians and Romans around 100 B C and ending with the spread of barbarian settlement in the western Empire Burns reframes the barbarians as neighbors friends and settlers His nuanced history subtly shows how

Rome's relations with the barbarians slowly evolved from general ignorance hostility and suspicion toward tolerance synergy and integration This long period of acculturation led to a new Romano barbarian hybrid society and culture that anticipated the values and traditions of medieval civilization **From Roman Provinces to Medieval Kingdoms** Thomas F. X.

introduction clear prologues to each section and makes the key debates of the subject accessible to students Barbarians, Maps, and Historiography Walter Goffart, 2023-05-31 To complement his first collection of articles Rome's Fall and After 1989 Walter Goffart presents here a further set of essays all but two published between 1988 and 2007 They mainly focus on two types of historiography early medieval narratives with special attention to Bede's Historia ecclesiastica and printed maps designed to portray and teach history with special attention to the ubiquitous map of the barbarian invasions The wide ranging concerns represented extend from the underside of the Life of St Severinus of Noricum and further evidence for dating Beowulf to the questions whether the barbarian invasions period was a heroic age and how Charlemagne shaped his own succession Attention is also paid to the earliest map illustrating the Anglo Saxon Heptarchy and to the historical vignettes of the Vatican Galleria delle carte geografiche The collection opens with the appraisal of certain writings dealing with what is now called ethnogenesis theory To conclude Professor Goffart adds brief second thoughts about each of these essays and supplies an annotated list of his articles that have not been reprinted **A Cumulative Bibliography of**

Barbarian Tides Walter Goffart, 2010-11-25 The Migration Age is still envisioned as an onrush of expansionary Germans pouring unwanted into the Roman Empire and subjecting it to pressures so great that its western parts collapsed under the weight Further developing the themes set forth in his classic *Barbarians and Romans* Walter Goffart dismantles this grand narrative shaking the barbarians of late antiquity out of this Germanic setting and reimagining the role of foreigners in the Later Roman Empire The Empire was not swamped by a migratory Germanic flood for the simple reason that there was no single ancient Germanic civilization to be transplanted onto ex Roman soil Since the sixteenth century the belief that purposeful Germans existed in parallel with the Romans has been a fixed point in European history Goffart uncovers the origins of this historical untruth and argues that any projection of a modern Germany out of an ancient one is illusory Rather the multiplicity of northern peoples once living on the edges of the Empire participated with the Romans in the larger stirrings of late antiquity Most relevant among these was the long militarization that gripped late Roman society concurrently with its Christianization If the fragmented foreign peoples with which the Empire dealt gave Rome an advantage in maintaining its ascendancy the readiness to admit military talents of any social origin to positions of leadership opened the door of imperial service to immigrants from beyond its frontiers Many barbarians were settled in the provinces without dislodging the Roman residents or destabilizing landownership some were even incorporated into the ruling families of the Empire The outcome of this process Goffart argues was a society headed by elites of soldiers and Christian clergy one we have come to call medieval

The Medieval Way of War Gregory I. Halfond, 2016-03-09 Few historians have argued so forcefully or persuasively as Bernard S Bachrach for the study of warfare as not only worthy of scholarly attention but demanding of it In his many publications Bachrach has established unequivocally the relevance of military institutions and activity for an understanding of medieval European societies politics and mentalities In so doing as much as any scholar of his generation he has helped to define the status quaestionis for the field of medieval military history The Medieval Way of War Studies in Medieval Military History in Honor of Bernard S Bachrach pays tribute to its honoree by gathering in a single volume seventeen original studies from an international roster of leading experts in the military history

of medieval Europe Ranging chronologically from Late Antiquity through the Later Middle Ages ca AD 300 1500 and with a broad geographical scope stretching from the British Isles to the Middle East these diverse studies address an array of critical themes and debates relevant to the conduct of war in medieval Europe These themes include the formation and implementation of military grand strategies the fiscal material and administrative resources that underpinned the conduct of war in medieval Europe and religious legal and artistic responses to military violence Collectively these seventeen studies embrace the interdisciplinarity and topical diversity intrinsic to Bachrach s research Additionally they strongly echo his conviction that the study of armed conflict is indispensable for an accurate and comprehensive understanding of medieval European history
