Miles, 2013-05-13 Metropolitan Problems is the end product of one of the most dynamic research programmes of its kind ever conceived and executed The book which took three years to complete represents the culmination of a two year study that was highlighted by a conference

held in Toronto in 1967. In the early 1960s the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas. The study, with the official cooperation of the United Nations, was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis. Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts. Working with these experts were study groups drawn from forty major metropolitan centres throughout the world. After making exhaustive studies of their respective urban centres, the groups reported their findings and submitted detailed briefs through their representatives at the conference. Throughout the symposium a conscious effort was made to examine single aspects of social, economic and physical change within the overall perspective of the metropolis. The book reflects this approach. Each chapter directs attention to specific problems of the metropolis, problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change. Together they prove that despite differences in technology, culture and political and social matters, the major urban areas of the world do have much in common. Emerging tendencies can be analysed and corrective and preventative measures be made through comparative analysis. This book was first published in 1970. *Law and Contemporary Problems*, 1949. **Human Rights** Michael Freeman, 2017-07-24. Human Rights is an introductory text that is both innovative and challenging. Its unique interdisciplinary approach invites students to think imaginatively and rigorously about one of the most important and influential political concepts of our time. Tracing the history of the concept, the book shows that there are fundamental tensions between legal, philosophical and social/scientific approaches to human rights. This analysis throws light on some of the most controversial issues in the field. Is the idea of the universality of human rights consistent with respect for cultural difference? Are there collective human rights? What are the underlying causes of human rights violations? And why do some countries have much worse human rights records than others? The third edition has been substantially revised and updated to take account of recent developments including the Arab Spring, the civil war in Syria, the refugee crisis, ISIS and international terrorism and climate change politics. Widely admired and assigned for its clarity and comprehensiveness, this book remains a go-to text for students in the social sciences as well as students of human rights law who want an introduction to the non-legal aspects of their subject. *Human Rights and Diversity: New Challenges for Plural Societies* Eduardo J. Ruiz Vieytez, Robert Dunbar, 2007-01-01. The democratic management of cultural diversity is the greatest political challenge for present-day European societies. The plural character of our societies forces us to rethink the basic political concepts starting off from a new idea of inclusive and plural democracy. The application of human rights must be reconsidered in the light of present-day reality so that democratic states are able to guarantee the benefit of these rights to all persons through their identity and not in spite of it, thus creating political spaces that are open to a multi-identity coexistence. **IHL Issues of Concern in**
