**Cosmopolitan Connections** Mark-Anthony Falzon, 2004 This accessible book draws on anthropological fieldwork conducted in a number of sites to explore the relation between mobility cosmopolitanism and commerce It is pioneering in

that it looks at Sindh is a widespread group that has so far been largely ignored by anthropologists      Class, Networks, and Identity Rhonda F. Levine, 2001-06-13 This book documents a little known aspect of the Jewish experience in America. It is a fascinating account of how a group of Jewish refugees from Nazi Germany came to dominate cattle dealing in south central New York and maintain a Jewish identity even while residing in small towns and villages that are overwhelmingly Christian. The book pays particular attention to the unique role played by women in managing the transition to the United States in helping their husbands accumulate capital and in recreating a German Jewish community. Yet Levine goes further than her analysis of German Jewish refugees. She also argues that it is possible to explain the situations of other immigrant and ethnic groups using the structure network identity framework that arises from this research. According to Levine, situating the lives of immigrants and refugees within the larger context of economic and social change but without losing sight of the significance of social networks and everyday life shows how social structure, class, ethnicity, and gender interact to account for immigrant adaptation and mobility.

**The Crypto-Jewish Mashhadis** Hilda Nissimi, 2006-12-01 This book tells the little known story of a fascinating crypto-Jewish community through two centuries and three continents. Beginning as a precarious settlement of a few families in mid-18th century Mashhad, an Islamic holy city in northern Iran, the community grew into a closely knit group in response to their forced conversion to Islam in 1839. Muslim hostility and a culture of memory sustained by intra-communal marriages reinforced their separate religious identity, vesting it in strong family and communal loyalty. Mashhadi women became the main agents of the cultural transmission of communal identity and achieved social roles and high status uncharacteristic for contemporary Jewish and Muslim communities. The Mashhadis maintained a double identity, upholding Islam in public while tenaciously holding onto their Jewish identity in secret. The exodus from Mashhad after 1946 relocated the communal center to Tehran, later to Israel, and after the Khomeini revolution to New York. The relationship between the formation and retention of communal identity and memory practices with interconnected issues of religion and gender draws upon existing research on other crypto-faith communities such as the Judeoconversos, the Moriscos, and the French Protestants, who through the special blend of memory, faith, and ethnicity emerged strengthened from their underground period. For the immigration period, the author challenges the old paradigm that modernity and religion are mutually exclusive. The book also explores the sometimes uncomfortable yet

intimate relationships that exist between seemingly incompatible ways of seeing the past both secular and religious

**Jewish-Muslim Relations and Migration from Yemen to Palestine in the Late Nineteenth and Twentieth Centuries** Ari Ariel, 2013-12-05 In Jewish Muslim Relations and Migration from Yemen to Palestine in the Late Nineteenth and Twentieth Centuries Ari Ariel analyzes the impact of local regional and international events on ethnic and religious relations in Yemen and Yemeni Jewish migration patterns Previous research has dealt with single episodes of Yemenite migration during limited spans of time Ariel instead provides a broad sweep of the migratory flows over the 70 year time span during which most of Yemen's Jews moved to Palestine and then Israel He successfully avoids the polemic nature of much of the literature on Middle Eastern Jewry by focusing on the social economic and political transformations that provoked and then sustained this migration

**Doing Engineering** Joyce Tang, 1999 The first to systematically compare Caucasians African Americans and Asian Americans in engineering this study of the career attainment and mobility of engineers in the United States tells how these three groups fare in the American engineering labor market and what they can look forward to in the future The numbers of black and Asian engineers recently have grown at a much faster rate than the number of Caucasian engineers With a projected steady increase in engineering jobs and demographic shifts this trend should continue Yet recent writings on the engineering profession have said little about career mobility beyond graduation This book identifies and explores key issues determining whether minorities in the US will attain occupational equality with their Caucasian counterparts Highlighting implications for theory policy making and the future of the profession Doing Engineering offers important insights into labor race and ethnicity that will be of interest to anyone studying stratification in a wide range of professional occupations
