Miracle Cures

Robert A. Scott

Miracle Cures:

Miracle Cures River Stone, AI, 2025-02-27 *Miracle Cures* explores the captivating intersection of faith, medicine, and history through accounts of miraculous healing across diverse religions and cultures. It examines narratives where recovery from illness or injury seemingly defies conventional medical explanations, revealing how these accounts have shaped cultural understanding and spiritual practices. The book highlights the enduring human quest for meaning and hope in the face of suffering, regardless of scientific verification, indicating the profound cultural, social, and psychological power of recurring narratives of miraculous healing events. The book analyzes case studies from ancient texts to contemporary reports, providing historical context, medical plausibility, and cultural significance. It acknowledges the tension between religious explanations for health and disease and the development of modern medicine. Exploring these narratives offers insight into the role of belief in health, healing, and the impact on medical ethics and the placebo effect. The book progresses through an introduction to the concept of miraculous healing, explores case studies, and concludes with an analysis of broader implications. *Miracle Cures* Robert A. Scott, 2011-10-04 Scott has written a magnificent book on the realities of religious healing. He brings sensibility, reason, impressive insight, and the best information to bear on qualities seldom manifested in the centuries of claim, cynicism, and controversy on the topic. His analysis is destined to raise the level of discourse on dramatic religious experiences. Neil Smelser, author of *The Odyssey Experience*. **Miracle Cures** Jean Carper, 2009-10-13 From Jean Carper, America's Most Trusted Source of Cutting Edge Nutritional Advice, the Bestselling Guide to the Dramatic Healing Powers of Herbs, Vitamins, and Other Natural Remedies, *Miracle Cures* is the breakthrough book that presents scientific evidence of the effectiveness of natural remedies culled from the world's leading doctors and scientists, research centers, and major international scientific journals, including the *Journal of the American Medical Association* and the *British Medical Journal*, combined with the awe-inspiring first-person medically verified accounts of people who have successfully cured themselves with natural medicines. A New Theory of Cure Tracy D Kolenchuk, 2021-09-08 Our current theory of cure isn t working When did it stop Today we can t cure most diseases When cured few can be proven cured Even the common cold the flu and measles I ve had them all cured Over 99 percent of cases are cured while medical theory there is no cure for The same is true for many other diseases We need a theory of cure that encompasses every curable medical condition or disease This book is the first step on that path Cure is defined by cause Every curable medical condition has a present cause that when addressed results in a cure Of course many diseases are compound and complex having multiple causes often causing other diseases themselves There is plenty of complexity To study cure we simplify first and then build our understanding from a solid foundation There are exactly two basic types of illness causes resulting in exactly two types of cures An element of illness has a single cause The cause of an illness might be found in diet body mind spirit community or environment of the afflicted The illness element is cured when the cause has been successfully addressed Once an illness is cured that cure is permanent No cure is permanent If the cause occurs again a new illness might occur This logic applies to every cure Cures are forward movements in life We can only go forward in life not backwards No cure is perfect Perfect cures are a myth Real cures are real Both healing and curing function by addressing the basic causes of illness Healing cures are unconscious intentional actions that successfully address the cause of an illness No healing cure is perfect even when the results are better than before Curing consists of intentional personal community and medical actions that address the cause of an illness Caring is attention by self and community to address the signs and symptoms of disease to aid and facilitate healthy tolerance of the signs and symptoms of disease and to aid and facilitate cures
