Mazes in Videogames Alison Gazzard, 2013-05-01 From the text adventures of Zork to the arcade game of Pac Man to the corridors of Doom and on to the city streets of Grand Theft Auto IV the maze has often been used as a space to trap and confuse players in their navigation of gameworlds However the maze as a construction on the landscape has a long history before the invention of the videogame By examining the change in the maze from the landscapes of open spaces and closed gardens through to the screen of the videogame both mazes and labyrinths are discussed in terms of historical reference alongside the author's personal experiences of walking and playing these structures This book shows how our cultural experiences of real world maze landscapes may have changed and how we negotiate videogame worlds along the various paths and meanings they so often create for us

Mirror, Mirror Mark Pendergrast, 2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness As our first technology for contemplation of the self the mirror is arguably as important an invention as the wheel Mirror Mirror is the fascinating story of the mirror's invention refinement and use in an astonishing range of human activities from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror's key role in the use and understanding of light Pendergrast spins tales of the 2 500-year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three days the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices and George Ellery Hale the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century's largest ground based telescope Like mirrors themselves Mirror Mirror is a book of endless wonder and fascination

Dark and Magical Places Christopher Kemp, 2022-01-25 Kemp is a natural storyteller a deft explainer and a terrific and funny writer Mary Roach author of Fuzz How the brain helps us to understand and navigate space and why sometimes it doesn't work the way it should Inside our heads we carry around an infinite and endlessly unfolding map of the world Navigation is one of the most ancient neural abilities we have older than language In Dark and Magical Places Christopher Kemp embarks on a journey to discover the remarkable extent of what our minds can do Fueled by his own spatial shortcomings Kemp describes the brain regions that orient us in space and the specialized neurons that do it Place cells Grid cells He examines how the brain plans routes recognizes landmarks and makes sure we leave a room through a door instead of trying to leave through a painting From the secrets of supernavigators like the indigenous hunters of the Bolivian rainforest to the confusing environments inhabited by people with place blindness Kemp charts the myriad ways in which we find our way and explains the cutting edge neuroscience behind them How did Neanderthals navigate Why do even seasoned hikers stray from the trail What spatial skills do we inherit from our parents

How can smartphones and our reliance on GPS devices impact our brains In engaging engrossing language Kemp unravels the mysteries of navigating and links the brain s complex functions to the effects that diseases like Alzheimer s types of amnesia and traumatic brain injuries have on our perception of the world around us A book for anyone who has ever felt compelled to venture off the beaten path *Dark and Magical Places* is a stirring reminder of the beauty in losing yourself to your surroundings And the beauty in understanding how our brains can guide us home **Living Pictures, Missing**

Persons Mark B. Sandberg,2021-10-12 In the late nineteenth century Scandinavian urban dwellers developed a passion for a new utterly modern sort of visual spectacle objects and effigies brought to life in astonishingly detailed realistic scenes The period 1880 1910 was the popular high point of mannequin display in Europe *Living Pictures Missing Persons* explores this phenomenon as it unfolded with the rise of wax museums and folk museums in the largest cities of Denmark Sweden and Norway Mark Sandberg asks Why did modernity generate a cultural fascination with the idea of effigy He shows that the idea of effigy is also a portal to understanding other aspects of visual entertainment in that period including the widespread interest in illusionistic scenes and tableaux in the portability of sights spaces and entire milieus Sandberg investigates this transformation of visual culture outside the usual test cases of the largest European metropolises He argues that Scandinavian spectators desired an unusual degree of authenticity a cultural preference for naturalism that made its way beyond theater to popular forms of museum display The Scandinavian wax museums and folk ethnographic displays of the era helped pre cinematic spectators work out the social implications of both voyeuristic and immersive display techniques This careful study thus anticipates some of the central paradoxes of twentieth century visual culture but in a time when the mannequin and the physical relic reigned supreme and in a place where the contrast between tradition and modernity was a high stakes game Official Gazette of the United States Patent Office United States.
