A Mirror to Nature Peter Knudtson,1991-01-01 **Mayalogue** Victor Montejo,2021-10-01 In Mayalogue Native Mayan scholar Victor Montejo provides an alternative reading and interpretation of cultures challenging Western ethnocentric approaches that have marginalized Native knowledge and worldviews in the past He proposes instead a methodology for studying culture as a unified whole a radical departure from the compartmentalized sections of knowledge recognized by Western scientific tradition Offering a strong critique of traditional anthropological studies with its terms and categories that have denigrated Indigenous cultures throughout the centuries Montejo s postcolonial work aims to dismantle the colonialist construction of Indigenous cultures giving way to a Native approach that balances insider and outsider descriptions of a particular culture Developed from an Indigenous Maya perspective Mayalogue is a contribution to the dialogue between Indigenous and non Indigenous scholars students and general audiences in the social sciences and humanities and will be an essential text in decolonizing the minds of those who engage in the study of cultures anywhere in the world in the twenty first century

Skin Deep Gavin Evans,2019-08-29 The dark heart of race science and why it s nonsense Racial differences are rooted in biological reality right That s certainly what a small group of anthropologists psychologists and pundits would have you believe Portraying themselves as brave defenders of the inconvenient truth this group took the revival of race science from alt right online message boards into mainstream academic journals They seek to justify raging social inequalities from poverty to incarceration rates with a simple message some people are just born to be poor There s just one problem race science isn t real The first Europeans had dark skin and black curly hair Culture was born in Africa not Western Europe Gavin Evans examines the latest research on how intelligence develops and laying out new discoveries in genetics palaeontology archaeology and anthropology to unearth the truth about our shared past Skin Deep stands up to the pseudo science deployed to justify colonial rule the apartheid regime and the vast inequalities that persist today As race dominates the political agenda it s time to put the hateful myths about it to bed

Racism Albert J. Wheeler,2000 Of all mankind s vices racism is one of the most pervasive and stubborn Success in overcoming racism has been achieved from time to time but victories have been limited thus far because mankind has focused on personal economic gain or power grabs ignoring generosity of the soul This bibliography brings together the literature providing access by subject groupings as well as author and subject indexes Contents Racial Attitudes Racism and Poverty Hate Groups Racial Justice Racism and Politics Race Discrimination Racial Identity Racism Around the World

Canadiana ,1991 *Scrutinizing Feminist Epistemology* Cassandra L. Pinnick,Noretta Koertge,Robert F. Almeder,2003 This volume presents the first systematic evaluation of a feminist epistemology of sciences power to transform both the practice of science and our society Unlike existing critiques this book questions the fundamental feminist suggestion that purging science of alleged male biases will advance the cause of both science and by extension social justice The book is divided into four sections the strange status of feminist epistemology testing feminist claims about scientific practice philosophical and political critiques of feminist epistemology and future prospects of feminist epistemology Each of the essays^{3 4}most of which are original to this text^{3 4} directly confronts the very idea that there could be a feminist epistemology or philosophy of science Rather than attempting to deal in detail with all of the philosophical views that fall under the general rubric of feminist epistemology the contributors focus on positions that provide the most influential perspectives on science Not all of the authors agree amongst themselves of course but each submits feminist theories to careful scrutiny *Scrutinizing Feminist Epistemology* provides a timely well rounded and much needed examination of the role of gender in scientific research

Canadian Books in Print Marian Butler,2000 **A Teacher's Guide to Science and Religion in the Classroom** Berry Billingsley,Manzoorul Abedin,Keith Chappell,2018-01-29 A Teacher s Guide to Science and Religion in the Classroom provides practical guidance on how to help children access positive ways of thinking about the relationship between science and religion Written for teachers of children from diverse faith and non faith backgrounds it explores key concepts identifies gaps and common misconceptions in children s knowledge and offers advice on how to help them form a deeper understanding of both science and religion Drawing on the latest research as well as the designs of successful workshops for teachers and for children there are activities in each chapter that have been shown to help children understand why science and religion do not necessarily conflict The book highlights children s interest in the so called Big Questions that bridge science and religion and responds to the research finding that most children are missing ideas that are key to an explanation of why science and religion can be harmonious The book explores key concepts and ideas including

Nature of science Power and limits of science Evolution genes and human improvement Miracles natural disasters and mystery Profiles of scientists including Galileo and Newton A Teacher s Guide to Science and Religion is an essential companion for preservice and practising teachers providing session plans and pedagogic strategies together with a cohesive framework that will support teachers in fostering children s curiosity and enthusiasm for learning

Bibliography of Agriculture ,1992-11 Current Biography Yearbook ,1995 *Scientism and Technocracy in the Twentieth Century* Richard G. Olson,2015-12-16 Scientism or the application of methods attitudes and concepts drawn from the natural sciences to human activities and social policy formation is a pervasive feature of modern life and it is one which has immense impact upon virtually all aspects of our private and public lives This work explores the impact of Scientific Management a movement initiated at the beginning of the twentieth century by the mechanical engineer Frederick Winslow Taylor in spreading scientific attitudes through its appropriation by technical experts technocrats who have played a central and growing role in formulating public policies not just in the United States but throughout the world It explores the movement of Scientific Management out of its initial American industrial context into progressive politics in the United States into the policies of the Third Reich those of the Soviet Union under Lenin and Stalin into Cold War policy formation in both the U S and the U S S R and into those of contemporary China and the European Union with short but important excursions into France Sweden Japan and the developing world Moreover it also explores some of the aesthetic dimensions of scientism and technocracy especially as they have been reflected in modernist architecture and literature and it examines current trends in education and the structure of advisory organizations such as RAND Corporation which are shaping the character and impact of scientific and technocratic attitudes Overall the approach is ambivalent toward scientism acknowledging some of its great strengths in promoting economic growth and providing advice on security related issues but offering criticisms of its narrow emphasis on efficiency its insensitivity to qualitative considerations and the experience of those with specialized local knowledge and its long term tendency to ignore distributive justice and promote income concentration

Uncertainty and Graphing in Discovery Work Wolff-Michael Roth,2014-08-08 This book deals with uncertainty and graphing in scientific discovery work from a social practice perspective It is based on a 5 year ethnographic study in an advanced experimental biology laboratory The book shows how in discovery work where scientists do not initially know what to make of graphs there is a great deal of uncertainty and scientists struggle in trying to make sense of what to make of graphs Contrary to the belief that scientists have no problem interpreting graphs the chapters in this book make clear that uncertainty about their research object is tied to uncertainty of the graphs It may take scientists several years of struggle in their workplace before they find out just what their graphs are evidence of Graphs turn out to stand to the entire research in a part whole relation where scientists not only need to be highly familiar with the context from which their data are extracted but also with the entire process by means of which the natural world comes to be transformed and represented in the graph This has

considerable implications for science technology engineering and mathematics education at the secondary and tertiary level as well as in vocational training This book discusses and elaborates these implications **Books in Print** ,1991

Christian Science Sentinel ,1900 *Through the Mirrors of Science* Francesco Coniglione,2013-05-02 Is the objective that the European Union set itself in 2000 that is to be the most competitive knowledge based society and economy by 2010 still realistic The momentous year has arrived but it is discouraging to note that very few steps have been made in the direction that was fixed What has gone wrong Were the philosophical epistemological and economic conditions adequate to achieve the desired result This book the result of a research project commissioned by the European Commission critically investigates the society of knowledge and the way in which the European Union has proceeded towards it examining first of all the premises and the contributions that the disciplines of Science and Technological Studies can provide In this way we have proposed innovative theoretical and epistemological bases for a multidisciplinary approach making use of the Modelling Approach to Science and therefore insisting on the function that human sciences can have for a society of knowledge that hinges not so much on an industrialist scenario but a humanist one that eschews hyper specialization and instead privileges creativity flexibility imagination and innovation economy **Reflecting on Darwin** Eckart Voigts,Barbara Schaff,2016-04-08 Taking up the historical evolution of Darwin and his theories and the cultural responses they have inspired Reflecting on Darwin poses the following questions How are the apparatuses in the mid nineteenth century and at the turn of the twenty first century interconnected with bio scientific paradigms in art literature culture and science How are naturalism determinism and Darwinism the eugenics of the nineteenth century and the genetic coding of the twentieth century positioned embodied and staged in various media configurations and media genres and How have particular media apparatuses formed displaced or stabilized the various concepts of humankind in the framework of evolutionary theory Ranging from the early circulation of Darwin s ideas to the present this interdisciplinary collection pays particular attention to Darwin s postmillennial reception Beginning with an overview of the historical development of contemporary ecological and ethical fears Reflecting on Darwin then turns to Darwin s influence on contemporary media neo Victorian literature and culture science fiction literature and film and contemporary theory In examining the plurality of ways in which Darwin has been rewritten and reappropriated this unique volume both mirrors and inspects the complexity of recent debates in Victorian and neo Victorian studies
