

The background of the top half of the cover is a painting of a large, multi-towered castle or fortress situated on a hill. The scene is misty or rainy, with a dark, overcast sky. The castle has several towers and battlements, and its architecture appears to be from a historical period. The overall tone is somber and atmospheric.

Dodgen,2001-02-01 The Yellow River has long been viewed as a symbol of China s cultural and political development its management traditionally held as a gauge of dynastic power For centuries the country s early rulers employed a defensive approach to the river by building dikes and diversion channels to protect fields and population centers from flooding This situation changed dramatically after the Yuan 1260 1368 emperors constructed the Grand Canal which linked the North China Plain and the capital at Beijing with the Yangtze Valley One of the most ambitious imperial

undertakings of any age by the turn of the nineteenth century the water system had become a complex network of locks spillways and dikes stretching eight hundred kilometers from the mountains in western Henan to the Yellow Sea Controlling the Dragon examines Yellow River engineering from two perspectives The first looks at long term efforts to manage the river starting in the early Ming dynasty at the nature of the bureaucracy created to do the job and finally focuses on two of the Confucian engineers who served successfully in the decade before the system was abandoned In the second section the author chronicles a series of dramatic floods in the 1840s and explores the way politics environment and technology interacted to undermine the state s commitment to the Yellow River control system
