Abstract: Recent development of age-determination techniques for Florida manatees (*Trichechus manatus latirostris*) has permitted derivation of age-specific data on reproduction and survival of a sample of 1212 carcasses obtained throughout Florida from 1976–1991. Population viability analysis using these data projects a slightly negative growth rate (-0.003) and an unacceptably low probability of persistence (0.44) over 1000 years. The main factors affecting population projections were adult survival and fecundity. A 10% increase in adult mortality would drive the population to extinction over a 1000-year time scale, whereas a 10% decrease in adult mortality would allow slow population growth. A 10% decrease in reproduction would also result in extinction. We conclude that management must focus on retaining and improving the conditions under which manatee demography operates. The major identified agent of mortality is boat-manatee collisions, and rapidly increasing numbers of humans and registered boats portend an increase in manatee mortality. Zoning of manatee-occupied waters for reductions in boating activity and speed is essential to safeguard the manatee population. If boating regulations being implemented by the state of Florida in each of 13 key coastal counties are completed, enforced, and effective, manatees and human recreation could coexist indefinitely. If regulation is unsuccessful, the Florida manatee population is likely to decline slowly toward extinction.

Análisis de Viabilidad Poblacional del Manatí de Florida (*Trichechus manatus latirostris*), 1976–1991

Resumen: El reciente desarrollo de técnicas para la determinación de edad para manatí de Florida *Trichechus manatus latirostris* ha permitido la generación de datos sobre reproducción y supervivencia con edad específica de una muestra de 1212 cadáveres obtenidos en Florida de 1976 a 1991. El análisis de viabilidad poblacional de estos datos proyecta una ligera tasa de crecimiento negativa (-0.003) y una inaceptable baja probabilidad de persistencia (0.44) a lo largo de 1000 años. Los factores más importantes que afectan las proyecciones de la población fueron la sobrevivencia de los adultos y la fecundidad. Un incremento del 10% en la mortalidad de los adultos podría derivar en la extinción de la población en una escala de tiempo de 1000 años, mientras que una disminución del 10% en la mortalidad de los adultos podría permitir un crecimiento poblacional lento. Una disminución del 10% en la reproducción de los adultos podría resultar también en la extinción de la especie. Concluimos que el manejo se debe enfocar en mantener y mejorar las condiciones bajo las cuales la demografía del manatí funciona. La más importante causa de mortalidad identificada son las colisiones de botes con manatí, sumado a esto, el rápido incremento en el número de humanos y botes registrados augura un incremento en la mortalidad de los manatí. La zonificación de aguas ocupadas por manatí para la reducción de la actividad y velocidad de botes es esencial para salvaguardar la población de manatí. Si la regulación de botes implementada por el Estado de Florida en cada uno de los 13 condados

concise informative text shares what scientists know about manatees while Lynch's beautiful photographs instantly demonstrate how special these potatoes with whiskers really are. By encouraging an appreciation of manatees the authors hope to help ensure a future in which Floridians can find ways to coexist with and continue to enjoy these uniquely wonderful sirenian inhabitants of their state. Included in this book: How manatees first came to Florida waters; How manatees fit into the ecosystems of Florida; What and how much manatees eat; How manatees behave and communicate with one another; Why manatees look the way they do; Why manatees have whiskers; How manatee mothers feed their young and much more. A lovely book that sounds as though it would appeal primarily to scientists but which offers inviting color photos and history that make it accessible to lay audiences both within Florida and outside the state.
