Population Change In The Rural West 1975 1990:

Population Change and Rural Society William A. Kandel, David L. Brown, 2006-01-13 This book contains the latest research on social and economic trends occurring in rural America It provides a unique focus on rural demography and the interaction between population dynamics and local social and economic change It is also the first volume on rural population that exploits data from Census 2000 The book highlights major themes transforming contemporary rural areas and each is examined with an expanded overview and case study Population Change in the Rural West, 1975-1990 John M. Wardwell, James H. Copp, 1997 Contents Preface The History and Context of Regional Research James J Zuiches and Dennis Oldenstadt Chapter 1 Migration Research in the West 1982 1992 John M Wardwell Chapter 2 Population and Economic Change in the Pacific Northwest Annabel K Cook Chapter 3 Social and Demographic Characteristics of the Mormon Culture Region Michael B Toney William F Stinner and Yongchan Byun Chapter 4 Immigration Dynamics and Domestic Labor Philip L Martin Chapter 5 The Myth of Rural Stability Population Turnover in Colorado and Montana Chapter 6 Reasons for Moving to the Inland Northwest and North Central States John M Wardwell and Corinne M Lyle Chapter 7 Social Change in Resource Development Communities James H Copp and Edward Knop Chapter 8 Economic Change and Diversification in Wyoming Audie L Blevins and Edward B Bradley Chapter 9 Economic Recession and Nonmetro Migration in the 1980s John M Wardwell and Corinne M Lyle Chapter 10 Metropolitan Nonmetropolitan Differences in Public Policy Orientations in Utah William F Stinner and Luis Paita **Rural Development Perspectives**, 1995 **Wilderness Science in a Time of**

Change Conference: Wilderness within the context of larger systems, 2000 *Rural America*, 2000 Amenities and Rural Development Gary P. Green, Steven C. Deller, David W. Marcouiller, 2005-01-01 While many rural areas continue to experience depopulation and economic decline others are facing rapid in migration as well as employment and income growth Much of this growth is due to the presence and use of amenity resources broadly defined as qualities of a region that make it an attractive place to live and work Rather than extracting natural resources for external markets these communities have begun to build economies based on promoting environmental quality Amenities and Rural Development explores the paradigmatic shift in how we view land resources and the potential for development in amenity rich rural regions

Wilderness Science in a Time of Change Conference, 2000 Proceedings RMRS., 2000 **Demographic Change in Australia's Rural Landscapes** Gary W. Luck, Digby Race, Rosemary Black, 2010-11-30 The distribution and re distribution of people across the landscape has significant implications for ecological economic and social dynamics Movement of people to urban centres mostly from rural landscapes especially in the developing world is a major global phenomenon This can result in the de population of rural landscapes Conversely population growth and a changing demographic profile have been identified for particular rural landscapes with notable examples from North America Europe and Australia Yet we know little of the factors that drive demographic changes in rural landscapes and even less about the implications of these changes This book

examines broad and local scale patterns of demographic change in rural landscapes identifies some of the drivers of these changes using Australian case studies or comparisons between Australian and international contexts and outlines the implications of changes for society and the environment This book makes a valuable contribution to the literature because it adopts an integrated and interdisciplinary approach by explicitly linking demographic change with environmental land use social and economic factors This integrated approach was achieved by encouraging interaction among authors writing on similar topics to ensure coherency and complementarity among chapters and cross pollination of ideas and perspectives Chapters are presented as interactive and reflective discussions that address the findings of other contributors yet each chapter contains enough background to stand alone as a unique contribution

Baby Boom Migration and Its Impact on Rural America John Cromartie, 2010 An analysis of age specific net migration during the 1990s reveals extensive shifts in migration patterns as Americans move through different life cycle stages Identifies the types of non metro counties that are likely to experience the greatest surge in baby boom migration during 2000-20 and projects the likely impact on the size and distribution of retirement age populations in destination counties The analysis finds a significant increase in the propensity to migrate to non metro counties as people reach their 50s and 60s and projects a shift in migration among boomers toward more isolated settings especially those with high natural and urban amenities and lower housing costs The non metro population age 55-75 will likely increase by 30% between now and 2020

Ill Urban-Rural Interfaces David N. Laband, B. Graeme Lockaby, 2020-01-22 What is the urban rural interface Is it a visual phenomenon a place where country gives way to neighborhoods and shopping areas in a startling way Is it a simple factor of population density There is nothing simple about the urban rural interface editors David Laband Graeme Lockaby and Wayne Zipperer present the broad spectrum of interdisciplinary complexities at play Organized into three sections on changing ecosystems changing human dimensions and the dynamic integration of human and natural systems this book is a must read for anyone who works in the real world where natural and human systems are joined This is the new sustainability science an emerging discipline that integrates social and economic values with the physical chemical and ecological functions of ecosystems The goal is optimal management since our human impact is often significant and far reaching in both space and time

An Introduction to Statistical Problem Solving in

Geography J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry level graduate students with limited backgrounds in statistical analysis and methods McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation

Slums of the World , **General Technical Report PNW-GTR** ,1997 **Slums of the World** Eduardo López Moreno, 2003 Population and Food in the Early Twenty-first Century Nurul Islam, 1995-01-01 The IFPRI roundtable with its focus on the prospects of a long term balance between food demand and supply provided a link between the two conferences as the adequacy of food supply at affordable prices for future populations is a crucial element in a strategy designed to alleviate poverty and accelerate growth in the context of an increasing population

Urban Food Insecurity and Malnutrition in Developing Countries Johshin Von Braun, 1993 Conceptual issues and policy focus Urbanization in the developing world implications for growth and poverty Urban food insecurity and malnutrition Policy choices and research implications Policy research priorities

The Urban Transport Crisis in Europe and North America J. Pucher, C. Lefevre, 1996-06-18 Increasing levels of auto ownership and use are causing severe social economic and environmental problems in virtually all countries in Europe and North America This book documents the worsening transport crisis and differences among countries in their urban transport and land use systems The focus is on public policies to deal with urban transport problems Through in depth case studies of eight countries the book seeks to evaluate the effectiveness of alternative solutions to transport problems and thus a way out of the transport crisis
