Por Qu Amamos Why We Love The Nature And Chemistry Of Romantic Love:

Why We Love Helen Fisher, 2005-01-02 A groundbreaking exploration of our most complex and mysterious emotion Elation mood swings sleeplessness and obsession these are the tell tale signs of someone in the throes of romantic passion In this revealing new book renowned anthropologist Helen Fisher explains why this experience which cuts across time geography and gender is a force as powerful as the need for food or sleep Why We Love begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love She proves at last what researchers had only suspected when you fall in love primordial areas of the brain light up with increased blood flow creating romantic passion Fisher uses this new research to show exactly what you experience when you fall in love why you choose one person rather than another and how romantic love affects your sex drive and your feelings of attachment to a partner She argues that all animals feel romantic attraction that love at first sight comes out of nature and that human romance evolved for crucial reasons of survival Lastly she offers concrete suggestions on how to control this ancient passion and she optimistically explores the future of romantic love in our chaotic modern world Provocative enlightening and persuasive Why We Love offers radical new answers to the age old question of what love is and thus provides invaluable new insights into keeping love alive

into the present century Psychology of Romantic Love ,1980 *The Psychology of Romantic Love* Nathaniel Branden,1980 **Love, Factually** Laura Mucha,2019-02-04 **The Scientific American Book of Love, Sex and the Brain** Judith Horstman,Scientific American,2011-11-15 Who do we love Who loves us And why Is love really a mystery or can neuroscience offer some answers to these age old questions In her third enthralling book about the brain Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love from the bonding of parent and child to the passion of erotic love the affectionate love of companionship the role of animals in our lives and the love of God Drawing on the latest neuroscience she explores why and how we are born to love how we re hardwired to crave the companionship of others and how very badly things can go without love Among the findings parental love makes our brain bigger sex and orgasm make it healthier social isolation makes it miserable and although the craving for romantic love can be described as an addiction friendship may actually be the most important loving relationship of your life Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines The Scientific American Book of Love Sex and the Brain offers a fascinating look at how the brain controls our loving relationships most intimate moments and our deep and basic need for connection *The Chemistry of Love* Michael R. Liebowitz,1938 **The Chemistry Between Us** Larry Young PhD,Brian Alexander,2012-09-13 How much control do we have over love Much less than we like to think All that mystery all that poetry all those complex behaviors surrounding human bonding leading to the most life changing decisions we ll ever make are unconsciously driven by a few molecules in our brains How does love begin How can two strangers come to the conclusion that it would not only be pleasant to share their lives but that they must share them How can a man say he loves his wife yet still cheat on her Why do others stay in relationships even after the romance fades How is it possible to fall in love with the wrong person How do people come to have a type Physical attraction jealousy infidelity mother infant bonding all the behaviors that so often leave us befuddled are now being teased out of the fog of mystery thanks to today s social neuroscience Larry Young one of the world s leading experts in the field and journalist Brian Alexander explain how those findings apply to you Drawing on real human stories and research from labs around the world The Chemistry Between Us is a bold attempt to create a grand unified theory of love Some of the mind blowing insights include Love can get such a grip on us because it is literally an addiction To a woman falling in love a man is like her baby Why it s false to say society makes gender and how it s possible to have the body of one gender and the brain of another Why some people are more likely to cheat than others Why we sometimes truly can t resist temptation Young and Alexander place their revelations into historical political and social contexts In the process they touch on everything from gay marriage to why single mother households might not be good for society The Chemistry Between Us offers powerful insights into love sex gender sexual orientation and family life that will prove to be enlightening controversial and thought provoking Why We Love Anna Machin,2022-02-01 An Oxford evolutionary anthropologist explores the

ever elusive science of love What can the social and life sciences tell us about the most fundamental and unquantifiable human experience love Anna Manchin is interested in the the the most inclusive possible answer one that unlike previous books on the subject considers friendship and family on par with romantic love as well as polyamory chosen families queer love and touchingly the love we feel for pets celebrities and deities Anna delves into these intimate relationships from the levels of biology chemistry and neuroscience all the way up to psychology sociology and evolution in engaging accessible and ever charming prose But Anna doesn't shy away from love's darker consequences its addictive nature which can lead us towards or leave us susceptible to manipulation coercion and even violence And yet in the end her book is an argument for love Growing evidence shows that the nature and quality of our relationships is the most significant factor in our life satisfaction happiness physical and mental health more important than quitting smoking or losing weight Love is the center of what makes us human It is by nature inefficient and in our ever busier world it can tend to be shunted to the side Anna's goal therefore is to expand our understanding and reinvigorate our awe at the complexities and intricacies of the human heart Building on the great tradition of writers like Esther Perel Alain de Botton Erich Fromm Stan Tatkin Sue Johnson and Helen Fisher Anna's depth of research and wells of empathy bring us many leaps forward in the eternal project of understanding ourselves

On Romantic Love Berit Brogaard, 2015 Romantic love presents some of life's most challenging questions Can we choose who to love Is romantic love rational Can we love more than one person at a time And can we make ourselves fall out of love In On Romantic Love Berit Brogaard attempts to get to the bottom of love's many contradictions This short book informed by both historical and cutting edge philosophy psychology and neuroscience combines a new theory of romantic love with entertaining anecdotes from real life and accessible explanations of the neuroscience underlying our wildest passions Against the grain Brogaard argues that love is an emotion that it can be at turns both rational and irrational and that it can be manifested in degrees We can love one person more than another and we can love a person a little or a lot or not at all And love isn't even always something we consciously feel However love like other emotions both conscious and not is subject to rational control and falling in or out of it can be a deliberate choice This engaging and innovative look at a universal topic featuring original line drawings by illustrator Gareth Southwell illuminates the processes behind heartbreak obsession jealousy attachment and more
