**How your Child can learn to Read and Write Before 6 (Free Version)** Montessori Helper,2014-02-07 It is a well known fact that the vast majority of children learn the alphabet by rote In other words they simply repeat the letters and learn them by repetition The ABC song is probably the best example of this misguided conventional wisdom The same applies to how most children learn the numbers 1 10 Since the alphabet and the number system are the most fundamental building blocks to all future language and mathematical learning in a child s life why is it that we do not allow the child to learn it in a way that aids comprehension not just memorisation by repetition In a concrete way where they will literally understand the difference between 1 and 2 or a and b Think about it how is a child meant to comprehend what 2 actually means when all they have heard is someone say 2 and they have simply repeated it much to the satisfaction of the doting parent or teacher It is this very logic that is often the catalyst for blocks and learning difficulties with Maths and other subject areas in later years By contrast one of the benefits of using the Montessori Method for teaching the alphabet and numbers is because she stresses how important it is to internalise a concrete concept first before building on that *Free Voluntary Reading*
