

READING McDOWELL

ON MIND AND WORLD

EDITED BY
NICHOLAS H. SMITH

Reading Mcdowell

Morten S. Thaning

Reading McDowell:

Reading McDowell Nicholas Smith, 2002-11 Internationally renowned contributors analyse and discuss John McDowell's challenging *Mind and World* Concludes with responses from McDowell himself An important contribution to analytic philosophy and the broader philosophical debate

Reading Putnam Maria Baghramian, 2013 Hilary Putnam is one of the world's leading philosophers His highly original and often provocative ideas have set the agenda for a variety of debates in philosophy of science philosophy of mind and philosophy of language His now famous philosophical thought experiments such as the Twin earth and the brains in the vat have become part of the established canon in philosophy and cognitive science *Reading Putnam* is an outstanding overview and assessment of Hilary Putnam's work by a team of international contributors and includes replies by Putnam himself Divided into clear sections it contains chapters on key aspects of Putnam's large body of writing including Scientific realism and the changes that Putnam's thought has undergone on this topic analyticity and ontology including the important interconnections between the views of Putnam and Quine Putnam's arguments concerning externalist views of meaning and reference questions of conceptual relativity and his preoccupation with ethics through a denial of the fact value dichotomy Putnam's developing views on perception Offering an excellent survey of Putnam's work *Reading Putnam* is essential for those studying philosophy of mind philosophy of language and philosophy of science as well as for anyone interested in contemporary philosophy

God, Value, and Nature Fiona Ellis, 2014 This book takes on board the assumption that we should be naturalists and argues that the position can accommodate the idea of God Naturalism and theism are no longer logically incompatible and the fashionable atheism of our times is shown to depend upon an unwarranted commitment to scientism and a questionable conception of God [As If!](#)

Chase Gregory, 2025-07-11 Chase Gregory explores the work of four early queer literary critics arguing that their work productively highlights the difficult relationship between identity and academic authorship [The Relevance of Hegel's](#)

[Concept of Philosophy](#) Luca Illetterati, Giovanna Miolli, 2021-12-16 In a systematic treatment of Hegel's concept of philosophy and all of the different aspects related to it this collection explores how Hegel and his understanding of his discipline can be put into dialogue with current metaphilosophical inquiries and shed light on the philosophical examination of the nature of philosophy itself Taking into account specific aspects of Hegel's elaboration on philosophy such the scientificity of philosophy as a self grounding rational process and his explanation of the relationship between philosophy and the history of philosophy an international line up of contributors consider Hegel's concept of philosophy in general from skepticism idealism history and difference to time politics and religion The relation of Hegel's concept of philosophy to other philosophical traditions and philosophers including Kant Fichte Schelling and Jacobi Hegel's concept of philosophy with reference to philosophy's relation to other forms of rationality and disciplines The relation of Hegel's concept of philosophy to specific issues in present metaphilosophical debates Reflecting the renewed and widespread interest in Hegel seen in Analytic philosophy and

Continental thought this volume advances study of Hegel's conceptual tools and provides new readings of traditional philosophical problems *'Yo!' and 'Lo!'* Rebecca Kukla, Mark Lance, 2009 Much of 20th century philosophy approached metaphysical and epistemological issues through an analysis of language This book demonstrates that non declarative speech acts including vocative hails Yo and calls to shared attention Lo are as fundamental to the possibility and structure of meaningful language as are declaratives **The Problem of Objectivity in Gadamer's Hermeneutics in Light of McDowell's Empiricism** Morten S. Thanning, 2015-08-21 This book reassesses Gadamer's hermeneutics by bringing it into a dialogue with John McDowell's minimal empiricism It employs the resources of McDowell's minimal empiricism to address the transcendental and ontological presuppositions for objective experience and understanding while retaining Gadamer's emphasis on the historicity of understanding By means of the dialogue with McDowell the book develops a hermeneutical conception of objectivity and perceptual experience which also entails reinterpretations of Gadamer's notions of tradition practical wisdom and meaning The book explores the philosophical space beyond the analytic Continental divide and demonstrates that hermeneutics is not limited to a reflection on understanding as it is practiced in the human sciences but can be revived as a distinct and cogent philosophical approach with a transcendental and ontological dimension Thanning's book is a richly detailed well argued and coherent presentation of a defensible and potentially very important philosophical position It demonstrates an impressively deep understanding of the literature both from the phenomenological tradition and from the part of the analytical tradition inspired by Wilfred Sellars to which John McDowell belongs Being a substantial philosophical achievement in its own right the book raises far reaching questions that will be of interest to a wide audience Dr Steven Crowell Rice University Houston USA Morten Thanning's book is an important contribution to the discourse of philosophical hermeneutics Thanning extensively discusses a topic which recent debates have touched upon but which up to now has not been the subject matter of concentrated scholarly work the relation between Gadamer's hermeneutics and McDowell's empiricism With Thanning's interpretation Gadamer work can be read anew as concerning the problem of hermeneutical objectivity Prof Dr G nter Figal University of Freiburg Germany **On the Genealogy of Color** Zed Adams, 2015-10-16 In *On the Genealogy of Color* Zed Adams argues for a historicized approach to conceptual analysis by exploring the relevance of the history of color science for contemporary philosophical debates about color realism Adams contends that two prominent positions in these debates Cartesian anti realism and Oxford realism are both predicated on the assumption that the concept of color is ahistorical and unrevisable Adams takes issue with this premise by offering a philosophical genealogy of the concept of color This book makes a significant contribution to recent debates on philosophical methodology by demonstrating the efficacy of using the genealogical method to explore philosophical concepts and will appeal to philosophers of perception philosophers of mind and metaphysicians *The Intentional Spectrum and Intersubjectivity* Michael D. Barber, 2011-06-15 World renowned analytic philosophers John McDowell and Robert Brandom

dubbed Pittsburgh Neo Hegelians recently engaged in an intriguing debate about perception In *The Intentional Spectrum and Intersubjectivity* Michael D Barber is the first to bring phenomenology to bear not just on the perspectives of McDowell or Brandom alone but on their intersection He argues that McDowell accounts better for the intelligibility of empirical content by defending holistically functioning reflectively distinguishable sensory and intellectual intentional structures He reconstructs dimensions implicit in the perception debate favoring Brandom on knowledge's intersubjective features that converge with the ethical characteristics of intersubjectivity Emmanuel Levinas illuminates Phenomenology becomes the third partner in this debate between two analytic philosophers critically mediating their discussion by unfolding the systematic interconnection among perception intersubjectivity metaphilosophy and ethics *German Idealism* Espen Hammer, 2007-08-07 This outstanding collection of specially commissioned chapters examines German idealism from several angles and assesses the renewed interest in the subject from a wide range of fields Including discussions of the key representatives of German idealism such as Kant Fichte and Hegel it is structured in clear sections dealing with metaphysics the legacy of Hegel's philosophy Brandom and Hegel recognition and agency autonomy and nature the philosophy of German romanticism Amongst other important topics *German Idealism: Historical and Philosophical Perspectives* addresses the debates surrounding the metaphysical and epistemological legacy of German idealism its importance for understanding recent debates in moral and political thought its appropriation in recent theories of language and the relationship between mind and world and how German idealism affected subsequent movements such as romanticism pragmatism and critical theory Contributors Espen Hammer Stephen Houlgate Sebastian Gardner Paul Redding Andrew Bowie Richard Eldridge Jay Bernstein Frederick Beiser Paul Franks Robert Pippin Fred Rush Manfred Frank Terry Pinkard Robert Stern
