Reading Terminal Market An Illustrated History:

Reading Terminal Market David K. O'Neil, 2004 Former general manager of the market tells its history through photos illustrations *Public Markets* Helen Tangires, 2008-04-08 The accompanying CD ROM contains high quality downloadable TIFF files of all the illustrations Jaquette **The Problem with Feeding Cities** Andrew Deener, 2020-10-10 For most people grocery shopping is a mundane activity Few stop to think about the massive global infrastructure that makes it possible to buy Chilean grapes in a Philadelphia supermarket in the middle of winter Yet every piece of food represents an interlocking system of agriculture manufacturing shipping logistics retailing and nonprofits that controls what we eat or don't The Problem with Feeding Cities is a sociological and historical examination of how this remarkable network of abundance and convenience came into being over the last century It looks at how the US food system transformed from feeding communities to feeding the entire nation and it reveals how a process that was once about fulfilling basic needs became focused on satisfying profit margins It is also a story of how this system fails to feed people especially in the creation of food deserts Andrew Deener shows that problems with food access are the result of infrastructural failings stemming from how markets and cities were developed how distribution systems were built and how organizations coordinate the quality and movement of food He profiles hundreds of people connected through the food chain from farmers wholesalers and supermarket executives to global shippers logistics experts and cold storage operators to food bank employees and public health advocates It is a book that will change the way we see our grocery store trips and will encourage us all to rethink the way we eat in this country Movable Markets Helen Tangires, 2019-05-07 The untold story of America's wholesale food business In nineteenth century America municipal deregulation of the butcher trade and state incorporated market companies gave rise to a flourishing wholesale trade In Movable Markets Helen Tangires describes the evolution of the American wholesale marketplace for fresh food from its development as a bustling produce district in the heart of the city to its current indiscernible place in food industrial parks on the urban periphery Tangires follows the middlemen those intermediaries who became functional necessities as the railroads accelerated the process of delivering perishable food to the city Tracing their rise and decline in the wake of a deregulated food economy she asks How did these people who occupied such key roles as food distributors and suppliers to the retail trade end up exiled to urban outskirts Moving into the early twentieth century she explains how progressive city planners and agricultural economists responded to anxieties about the high cost of living traffic congestion and disruptions in the food supply by questioning the centrality aging infrastructure and organizational structure of wholesale markets Tangires combines economic and cultural history by analyzing popular literature innovative scholarship and USDA publications Detailing the legal physical and organizational means behind the complex exodus of food wholesaling from the urban core Tangires also reveals how the trade adjusted to life beyond the city limits as it created new channels of distribution product lines and markets Readers interested in US history city and regional

planning history food history and public policy as well as anyone curious about the disappearance of the central produce district as a major component of the city will find *Movable Markets* a fascinating read

Public Markets and Civic Culture in Nineteenth-Century America Helen Tangires, 2020-03-24 Originally published in 2003 In *Public Markets and Civic Culture in Nineteenth Century America* Helen Tangires examines the role of the public marketplace social and architectural as a key site in the development of civic culture in America More than simply places for buying and selling food Tangires explains municipally owned and operated markets were the common ground where citizens and government struggled to define the shared values of the community Public markets were vital to civic policy and reflected the profound belief in the moral economy the effort on the part of the municipality to maintain the social and political health of its community by regulating the ethics of trade in the urban marketplace for food Tangires begins with the social architectural and regulatory components of the public market in the early republic when cities embraced this ancient system of urban food distribution By midcentury the legalization of butcher shops in New York City and the incorporation of market house companies in Pennsylvania challenged the system and hastened the deregulation of this public service Some cities demolished their marketing facilities or loosened restrictions on the food trades in an effort to deal with the privatization movement However several decades of experience with dispersed retailers suburban slaughterhouses and food transported by railroad proved disastrous to the public welfare prompting cities and federal agencies to reclaim this urban civic space
