Knowledgeable Women Sara Delamont, 2002-06-01 In *Knowledgeable Women* Sara Delamont traces the history of women s education and the elites it produces She examines class and gender divisions in the structure and contest of education in Britain and the USA from 1850 to the present day Her empirical focus is of course elites especially elite women but the justification for this is the belief that sociologists should study the powerful as well as the poor and powerless Above all Delamont argues the case for the relevance to sociology of a serious study of women their schooling and professional training and their struggle to enter the professions She also encourages a broader focus to the sociology of education itself viewing her subject from an anthropological structuralist perspective and encouraging the inclusion of anti sexist ideas and material from other areas of sociology such as the study of science and stratification She demonstrates for the first time the relevance

The Public Realm Lyn H. Lofland, 2017-07-12 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars buses plazas parks coffee houses streets and so forth More specifically the book is about the social life that occurs in such social psychological spaces the normative patterns and principles that shape it the relationships that characterize it the aesthetic and interactional pleasures that enliven it and the forces anti urbanism privatism post war planning and architecture that threaten it The data upon which the book's analysis is based are diverse direct observation interviews contemporary photographs historic etchings prints and photographs and historical maps histories of specific urban public spaces or spatial types and the relevant scholarly literature from sociology environmental psychology geography history anthropology and architecture and urban planning and design Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm this quintessential feature of city life deserves much more than it deserves to be the object of direct scholarly interest in its own right Choice noted that The author's writing style is unusually accessible and the often fascinating narrative is generously supported by well chosen photos
