Readings in Sports Psychology: Competitive sport and personality development Harold Thomas Anthony Whiting,1972
Journal of Physical Education and Recreation ,1977 **Individual Differences in Movement** D.B. Kirkcaldy,2012-12-06 This book is an attempt to bridge the gap between differential psychology and human movement It is curious that each discipline has received considerable attention in its own right but little effort has been made to cross fertilize them Some experimentalists view this union as the equivalent of committing academic adultery they have tended to concentrate on general theories and models of motor control and movement viewing individual differences as awkward and best assigned to the error variance component of an analysis By neglecting person variables valuable information is discarded people do differ in terms of ability attitude motivation and temperament and it is hardly surprising that such differences interact with a variety of experimental and situational paradigms The causes and determinants of individual differences must be examined at an interdisciplinary level incorporating studies from experimental physiological clinical and educational psychology This synthesis could not have been actualized by any single contributor For this reason a multi authored approach has been adopted in which 17 specialists have been assembled to present the current position of individual difference research in their respective disciplines The authors were granted maximum freedom in their selection and presentation of material What emerges is hopefully a novel and informative collection of articles addressed to a wide audience and providing an impulse for further research **FIEP Bulletin** ,1976 日本体育学会誌 (Japan),1978
