The Ethnomusicology of Western Art Music Laudan Nooshin,2013-10-23 Since the late 1980s the boundaries between the musicologies have become increasingly blurred Most notably a growing number of musicologists have become interested in the ideas and methodologies of ethnomusicology and in particular in applying one of the central methodological tools of ethnomusicology ethnography to the study of Western art music a tradition which had previously been studied primarily through scores recordings and other historical sources Alongside this since the 1970s a small number of ethnomusicologists have also written about Western art music thus complicating the idea of ethnomusicology as the study of other music Indeed there has been a growth in this area of scholarship in recent years Approaching western art music through the perspectives of ethnomusicology can offer new and enriching insights to the study of this musical tradition as shown in the writings presented in this book The current volume is the first collection of essays on this topic and includes work by authors from a range of musicological and ethnomusicological backgrounds exploring a variety of issues including music in orchestral outreach programmes new audiences for classical music concerts music and conflict transformation ethnographic study of the rehearsal process and the politics of a high profile music festival This book was originally published as a special issue of *Ethnomusicology Forum* Library of Congress Subject Headings Library of Congress,1990 Library of Congress Subject Headings Library of Congress. The Changing Social Economy of Art Hans Abbing,2019-09-14 Is art for everybody Why do art lovers attach so much value to authenticity autonomy and authorship Why did the arts become so serious in the first place Why do many artists reject commerce and cultural entrepreneurship Crucially are any of the answers to these questions currently changing Hans Abbing is uniquely placed to answer such questions and drawing on his experiences as an economist and sociologist as well as a professional artist in this volume he addresses them head on In order to investigate changes in the social economy of the arts Abbing compares

developments in the established arts with those in the popular arts and proceeds to outline key ways that the former can learn from the latter by lowering the cost of production fostering innovation and becoming less exclusive These assertions are contextualized with analysis of the separation between serious art and entertainment in the nineteenth century lending credence to the idea that government supported art worlds have promoted the exclusion of various social groups Abbing outlines how this is presently changing and why while the established arts have become less exclusive they are not yet for everybody
