Representing the Real Ruth Ronen, 2021-08-30 This study offers a new perspective on the object represented by art specifically by art that succeeds to create in its receiver a sense of the real a sense of approximating the true nature of the represented object that lies outside the artwork The object that cannot be accessed through a concept a meaning or a sign the thing in itself is generally rejected by philosophy as being outside the realm of its concerns This rejection is surveyed in a number of philosophical discussions from Kant to Hilary Putnam Turning to the psychoanalytic object an object inexhaustible in terms of its external existence or in terms of its conceptual status or meaning the object is always suppressed partly known inaccessible another notion of the object The Real is suggested as what can neither be contained in language nor reduced to a linguistic referent This solution does not lead away from philosophical interests but rather exposes this dilemma about the object of representation as fundamentally philosophical Cases of artistic realism discussed range from perspective painting to abstract art from tragedies to the literary representation of minds

Krebs,2021-08-12 Winner of the Gradiva Best Book Award 2022 and the Courage to Dream Book Prize 2023 from the Academy of the American Psychoanalytic Association This book is a psychoanalytic and philosophical exploration of how the digital is transforming our perception of the world and our understanding of ourselves Drawing on examples from everyday life myth and popular culture this book argues that virtual reality is only the latest instantiation of the phenomenon of the virtual which is intrinsic to human being It illuminates what is at stake in our understanding of the relationship between the virtual and the real showing how our present technologies both enhance and diminish our psychological lives The authors claim that technology is a pharmakon at the same time both a remedy and a poison and in their writing exemplify a method that overcomes the polarization that compels us to regard it either as a liberating force or a dangerous threat in human life The digital revolution challenges us to reckon with the implications of what is being called our posthuman condition leaving behind our modern conception of the world as constituted by atemporal essences and reconceiving it instead as one of processes and change The book s postscript considers the sudden plunge into the virtual effected by the 2020 global pandemic Accessible and wide reaching this book will appeal not only to psychotherapists psychoanalysts and philosophers but anyone interested in the ways virtuality and the digital are transforming our contemporary lives **Being, Time, Bios**
