Roman Britain is a critical area of research within the provinces of the Roman empire Within the last 15 20 years the study of Roman Britain has been transformed through an enormous amount of new and interesting work which is not reflected in the main stream literature Romans and Barbarians Beyond the Frontiers Sergio Gonzalez Sanchez,Alexandra Gugliemi,2017-03-31 This first thematic volume of the new series TRAC Themes in Roman Archaeology brings renowned international experts to discuss different aspects of interactions between Romans and barbarians in the northwestern regions of Europe Northern Europe has become an interesting arena of academic debate around the topics of Roman imperialism and Roman barbarian interactions as these areas comprised Roman provincial territories the northern frontier system of the Roman Empire limes the vorlimes or buffer zone and the distant barbaricum This area is today host to several modern European nations with very different historical and academic discourses on their Roman past a factor in the recent tendency towards the fragmentation of approaches and the application of postcolonial theories that have favored the advent of a varied range of theoretical alternatives Case studies presented here span across disciplines and territories from American anthropological studies on transcultural discourse and provincial organization in Gaul to historical approaches to the propagandistic use of the limes in the early 20th century German empire from Danish research on warrior identities and Roman Scandinavian relations to innovative ideas on culture contact in Roman Ireland and from new views on Romano Germanic relations in Central European Barbaricum to a British comparative exercise on frontier cultures The volume is framed by a brilliant theoretical introduction by Prof Richard Hingley and a comprehensive concluding discussion by Prof David Mattingly **A Companion to the Archaeology of the Roman Republic** Jane DeRose Evans,2013-03-29 A

Companion to the Archaeology of the Roman Republic offers a diversity of perspectives to explore how differing approaches and methodologies can contribute to a greater understanding of the formation of the Roman Republic Brings together the experiences and ideas of archaeologists from around the world with multiple backgrounds and areas of interest Offers a vibrant exploration of the ways in which archaeological methods can be used to explore different elements of the Roman Republican period Demonstrates that the Republic was not formed in a vacuum but was influenced by non Latin speaking cultures from throughout the Mediterranean region Enables archaeological thinking in this area to be made accessible both to a more general audience and as a valuable addition to existing discourse Investigates the archaeology of the Roman Republican period with reference to material culture landscape technology identity and empire **Roman Finds** Richard Hingley, Steven Willis, 2007-04-10

Studies on finds in Roman Britain and the Western Provinces have come to greater prominence in the literature of recent years The quality of such work has also improved and is now theoretically informed and based on rich data sets Work on finds over the last decade or two has changed our understanding of the Roman era in profound ways and yet despite such encouraging advances and such clear worth there has to date been little in the way of a dedicated forum for the presentation and evaluation of current approaches to the study of material culture The conference at which these papers were initially presented has gone some way to redressing this and these papers bring the very latest studies on Roman finds to a wider audience Twenty papers are here presented covering various themes The Archaeology of Roman Britain Adam Rogers, 2014-10-10

Within the colonial history of the British Empire there are difficulties in reconstructing the lives of people that came from very different traditions of experience The Archaeology of Roman Britain argues that a similar critical approach to the lives of people in Roman Britain needs to be developed not only for the study of the local population but also those coming into Britain from elsewhere in the Empire who developed distinctive colonial lives This critical biographical approach can be extended and applied to places structures and things which developed in these provincial contexts as they were used and experienced over time This book uniquely combines the study of all of these elements to access the character of Roman Britain and the lives experiences and identities of people living there through four centuries of occupation Drawing on the concept of the biography and using it as an analytical tool author Adam Rogers situates the archaeological material of Roman Britain within the within the political geographical and temporal context of the Roman Empire This study will be of interest to scholars of Roman archaeology as well as those working in biographical themes issues of colonialism identity ancient history and classics Beyond the Romans Irene Selsvold, Lewis Webb, 2020-04-09

This latest volume in the TRAC Themes in Theoretical Roman Archaeology series takes up posthuman theoretical perspectives to interpret Roman material culture These perspectives provide novel and compelling ways of grappling with theoretical problems in Roman archaeology producing new knowledge and questions about the complex relationships and interactions between humans and non humans in Roman culture and society Posthumanism constitutes a

multitude of theoretical positions characterised by common critiques of anthropocentrism and human exceptionalism. In part they react to the dominance of the linguistic turn in humanistic sciences. These positions do not exclude the human but instead stress the mutual relationship between matter and discourse. Moreover they consider the agency of non humans e.g. animals, material culture, landscapes, climate and ideas, their entanglement with humans and the situated nature of research. Posthumanism has had substantial impacts in several fields including critical studies, archaeology, feminist studies even politics but have not yet emerged in any fulsome way in Classical Studies and Classical Archaeology. This is the first volume on these themes in Roman Archaeology aimed at providing valuable perspectives into Roman myth, art and material culture, displacing and complicating notions of human exceptionalism and individualist subjectivity. Contributions consider non human agencies, particularly animal, material, environmental and divine agencies, critiques of binary oppositions and gender roles and the Anthropocene. Ultimately the papers stress that humans and non humans are entangled and imbricated in larger systems, we are all post human.

Theoretical Roman Archaeology Peter Rush, 1995. This volume had its origins in the second Theoretical Roman Archaeology Conference held in 1992 at Bradford which followed the ethos of the first conference, an essentially egalitarian arena for discussion of and fighting over the introduction and application of theory in Roman archaeology. Accepting the need for explicit awareness of theory in Roman archaeology, the contributors get on with the business of showing how a wide variety of perspectives and intellectual approaches offer new insights or alternative interpretations of a range of data. This, the second volume on theoretical Roman archaeology, surely demonstrates not only the enthusiasm generated by new ideas but something of the intellectual rigour required to use them.

The Bloomsbury Handbook of Experimental Approaches to Roman Archaeology Lee Graña Nicolaou, Tatiana Ivleva, Bill Griffiths, 2024-12-12. This volume is the first comprehensive overview of Roman experimental archaeology, exploring its key themes, methodologies and applications through a diverse array of international case studies. Experiments, simulations and reconstructions are important methods for understanding the past, from uncovering how ancient objects and structures were made, used, destroyed, deposited and affected underground, to illuminating the experiences of tasting ancient foods, fighting alongside comrades or living in replicated structures. Although the incorporation of experimentation has had great success in prehistoric studies, greater reliance on the wealth of literary and material sources remaining from the classical period has meant that its potential for Roman studies has yet to be fully realised. The 26 chapters in this book are divided into 5 thematic parts, each of which opens with a contextualizing introduction that frames the detailed case studies found in individual chapters and showcases the actual and potential diversity of experimentation as applied to the Roman past by scholars, re-enactors and practitioners in the heritage sector. In laying out a detailed guide to Roman experimental archaeology, the volume as a whole maps its past, present and future and provides a firm foundation for further practical research and collaboration. In doing so, it reasserts that experiments and reconstructions are a significant resource for testing or

developing theories rather than merely artistic replicas and that the vast amount of quantifiable data they yield can be invaluable in support of interpretations of relevant archaeological or historical evidence regardless of the period in question and beyond the confines of academia

Rome and Barbaricum: Contributions to the Archaeology and History of Interaction in European Protohistory Roxana-Gabriela Curcă, Alexander Rubel, Robin P. Symonds, Hans-Ulrich

Voß, 2020-05-28 How did the Barbarians influence Roman culture What did Roman ness mean in the context of Empire What did it mean to be Roman and or Barbarian in different contexts 9 papers explore concepts of Romanisation and of Barbaricum from a multi disciplinary and comparative standpoint covering Germania Dacia Moesia Inferior Hispania and more

Materialising the Roman Empire Jeremy Tanner, Andrew Gardner, 2024-03-19 Materialising the Roman Empire defines an innovative research agenda for Roman archaeology highlighting the diverse ways in which the Empire was made materially tangible in the lives of its inhabitants The volume explores how material culture was integral to the processes of imperialism both as the Empire grew and as it fragmented and in doing so provide up to date overviews of major topics in Roman archaeology Each chapter offers a critical overview of a major field within the archaeology of the Roman Empire The book s authors explore the distinctive contribution that archaeology and the study of material culture can make to our understanding of the key institutions and fields of activity in the Roman Empire The initial chapters address major technologies which at first glance appear to be mechanisms of integration across the Roman Empire roads writing and coinage The focus then shifts to analysis of key social structures oriented around material forms and activities found all over the Roman world such as trade urbanism slavery craft production and frontiers Finally the book extends to more abstract dimensions of the Roman world art empire religion and ideology in which the significant themes remain the dynamics of power and influence The whole builds towards a broad exploration of the nature of imperial power and the inter connections that stimulated new community identities and created new social divisions

Iron Age and Roman Coin Hoards in Britain

Roger Bland, Adrian Chadwick, Colin Haselgrove, David Mattingly, 2020-06-30 More coin hoards have been recorded from Roman Britain than from any other province of the Empire This comprehensive and lavishly illustrated volume provides a survey of over 3260 hoards of Iron Age and Roman coins found in England and Wales with a detailed analysis and discussion Theories of hoarding and deposition and examined national and regional patterns in the landscape settings of coin hoards presented together with an analysis of those hoards whose findspots were surveyed and of those hoards found in archaeological excavations It also includes an unprecedented examination of the containers in which coin hoards were buried and the objects found with them The patterns of hoarding in Britain from the late 2nd century BC to the 5th century AD are discussed The volume also provides a survey of Britain in the 3rd century AD as a peak of over 700 hoards are known from the period from AD 253 296 This has been a particular focus of the project which has been a collaborative research venture between the University of Leicester and the British Museum funded by the AHRC The aim has been to understand the

reasons behind the burial and non recovery of these finds A comprehensive online database <https://finds.org.uk/database> underpins the project which also undertook a comprehensive GIS analysis of all the hoards and field surveys of a sample of them

Journal of Roman Pottery Studies Steven Willis,2021-07-07 The Journal of Roman Pottery Studies continues to present a range of important new research in the field by both established and early career scholars Volume XVIII has a strong theme on pottery production with papers on kiln sites mortaria and late Roman pottery production in East Anglia and at a small town in Belgium A major new third century assemblage from civitas Cananefatium in South Holland is presented The second part of an important gazetteer of less common samian ware fabrics and types in northern and western Britain covers fabrics from Central and East Gaul *Exeter: A Roman Legionary Fortress and Civitas Capital* John Pamment Salvatore,2024-02-15 This accessible summary of the archaeological evidence from Roman Exeter reveals its origins as a legionary fortress garrisoned by the Second Augustan Legion After the legion departed to Wales Exeter became a Roman regional capital and continued to flourish on the very western edge of the Empire before its ultimate demise in the late 4th century

The Archaeology of Early Rome and Latium Ross R. Holloway,2014-05-12 The archaeology of early Rome has progressed rapidly and dramatically over the last century most recently with the discovery of the shrine of Aeneas at Lavinium and the reports of the walls of the Romulan city discovered on the city slopes of the Palatine Hill The Archaeology of Early Rome and Latium presents the most recent discoveries in Rome and its surroundings princely tombs inscriptions and patrician houses are included in a complete overview of the subject and the controversies surrounding it This comprehensively illustrated study fills the need for an accessible English guide to these new discoveries and in preparation the author interviewed most of the leading figures in current research on the early periods of Rome

[The Socio-Economics of Roman Storage](#) Astrid Van Oyen,2020-05-14 This is the first archaeological study to approach the central problem of storage in the Roman world holistically across contexts and datasets of interest to students and scholars of Roman archaeology and history and to anthropologists keen to link the scales of farmer and state
