**Temples and Sanctuaries in the Roman East** Arthur Segal,2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axiality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion **Sage and Emperor** Philip A. Stadter,L. Van der Stockt,2002 The overall objective is to establish the context of Plutarch s work in the society and the historical circumstances for which it was written **Encyclopedia of Greece and the Hellenic Tradition** Graham Speake,2021-01-31 Hellenism is the living culture of the Greek speaking peoples and has a continuing history of more than 3 500 years The Encyclopedia of Greece and the Hellenic Tradition contains approximately 900 entries devoted to people places periods events and themes examining every aspect of that culture from the Bronze Age to the present day The focus throughout is on the Greeks themselves and the continuities within their own cultural tradition Language and religion are perhaps the most obvious vehicles of continuity but there have been many others law taxation gardens music magic education shipping and countless other elements have all played their part in maintaining this unique culture Today Greek arts have blossomed again Greece has taken its place in the European Union Greeks control a substantial proportion of the world s merchant marine and Greek communities in the United States Australia and South Africa have carried the Hellenic tradition throughout the world This is the first reference work to embrace all aspects of that tradition in every period of its existence **Paul's Offer of Leniency**

**(2 Cor 10:1)** Donald Dale Walker, 2002 Originally presented as the author's thesis Ph D University of Chicago 1998  
Baroque Architecture in Classical Antiquity Margaret Lyttelton, 1974      The Cambridge Ancient History Alan K.  
Bowman, Peter Garnsey, Dominic Rathbone, 1982      **Reconstructing the Historical Background of Paul's Rhetoric in  
the Letter to the Colossians** Adam Copenhaver, 2018-01-25 In approaching the debate surrounding the opponents in  
Colossians from a methodological standpoint Copenhaver contends that Paul was not actually confronting active opponents  
when he wrote the letter Rather Copenhaver takes the view that Paul's letter was written to the churches in the Lycus Valley  
in a desire to develop their identity as a new people in Christ and to appeal to them to live a new kind of life His warnings in  
Colossians 2 function as oppositional rhetoric contrasting the religious practices of the Lycus Valley with this new belief Paul  
s warnings are therefore broadly representative of the ancient world while at the same time focused especially on two  
threads of historical referents Judaism and pagan religions Development of the above argument demonstrates that the  
challenge of reconstructing a singular opponent arises not only from the limitations of textual and historical evidence but  
also from the assumptions and methodologies inherent in historical approaches to the text By modifying these assumptions  
and adjusting the methodology Copenhaver can show how Paul's letter takes on a new relationship to its historical context
