The Rhaeto-Romance Languages Paola Beninca, John Haiman, 2005-12-20 The Rhaeto Romance languages have been known as such to the linguistic community since the pioneering studies of Ascoli and Gartner over a century ago There has never been a community of RR speakers based on a common history or polity and the various dialects are mutually unintelligible but a unity based on a number of common features has been advanced This book is the first general description of the Rhaeto Romance languages to be written in English It provides a critical examination of the phonology morphology lexicon and syntax of the modern Rhaeto Romance dialects within the broader perspective of Romance comparative linguistics

A Course in Romance Linguistics Frederick Browning Agard, 1984 A comparative contrastive description of five modern Romance languages French Spanish Portuguese Italian Roumanian in terms of underlying grammar manifested in surface similarities and differences **Linguistic Theory and the Romance Languages** John Charles Smith, Martin Maiden, 1995-07-20 This volume contains revised versions of papers given at a conference at the Manoir de Brion in Normandy They deal with phonology morphology syntax and semantics and cover a wide range of Romance languages including many lesser known varieties The contributors to the volume are committed to the view that Romance Linguistics is

not narrowly philological but is rather General Linguistics practised with reference to particular data The point has been made many times but is worth reiterating that Latin and the Romance languages offer an unrivalled wealth of synchronic and historical documentation and provide both a stimulus and a test bed for ideas about language structure language change and language variation Many of the papers in this volume can be interpreted simultaneously as using the analytical tools of linguistic theory to illuminate the structure of individual Romance languages or of the family as a whole and as using Romance data to throw light on general problems in linguistic theory or on the structure of languages beyond Romance Specific areas covered include prosodic domains quantification agreement the prepositional accusative clitic pronouns voice and aspect
