Romancing The Universe Theology Science And Cosmology:

Romancing the Universe Jeffrey G. Sobosan, 1999 If religious belief is to remain intellectually persuasive in the coming century it will need to seek a mutually respectful partnership with the leading theories and findings of science In this finely constructed reflection on the relationship between theology and scientific inquiry Jeffrey Sobosan shows how this goal might be achieved by wedding the best from both disciplines into a single coherent vision of the cosmos *Romancing the Universe* urges a new symmetry in our modern quest for truth one that allows theology to incorporate science into its doctrines while refusing to diminish the contribution theology can make to science Sobosan discusses the scientific and theological aspects of many of the major themes in cosmology including the beginning and end of the universe the origins of matter and life the presence of cosmic order the possibility of intelligent life elsewhere in the universe and the aesthetics of scientific theorizing

voices from biodiversity studies geology aesthetics literature astrophysics and others to illustrate precisely why a constructive and sustainable dialogue is needed within the current scientific climate Liberal Protestantism and Science Leslie A. Muray, 2007-12-30 Many students and members of the public who follow news reports on science and religion may think that Protestantism and science are in conflict But while evangelical attacks on evolution may make the headlines many mainstream Protestant groups have long embraced science and the scientific worldview This volume in the Greenwood Guides to Science and Religion covers those Protestant thinkers who seek to use the insights of science to further their understanding of religion and faith In addition the volume will also discuss such trends at the liberal protestant acceptance of evolution the advent of ecotheology and the Social Gospel The volume includes a selection of primary source documents a glossary and a timeline and an annotated bibliography of the most useful resources for further research **Entertaining the Triune Mystery** Jeffrey C. Pugh, 2003-10-01 Drawing on one of Christianity's great mysteries the life of the Trinity Jeffrey Pugh seeks to bridge the gap between ancient faith traditions and scientific inquiry in part by celebrating that gap itself as God's essence Pugh uses the wisdom of Plato Irenaeus the Cappadocians Einstein and many others to prompt us to think of God's energies within the processes of creation and life as the presence of God's suffering love for the cosmos God not only nourishes the possibilities of the creation but is fully present in them both suffering with and extending hope for a world coming to be BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Entangled God** Kirk Wegter-McNelly, 2012-03-12 In The Entangled God Kirk Wegter McNelly addresses the age old theological question of how God is present to the world by constructing a novel scientifically informed account of the God world relation Drawing on recent scientific and philosophical work in quantum entanglement Wegter McNelly develops the metaphor of divine entanglement to ground the relationality and freedom of physical process in the power of God's relational being The Entangled God makes a three fold contribution to contemporary theological and religious discourse First it calls attention to the convergence of recent theology around the idea of relationality Second it introduces theological and religious readers to the fascinating story of quantum entanglement Third it offers a robust plerotic alternative to kenotic accounts of God's suffering presence in the world Above all this book takes us beyond the view of theology and science as adversaries and demonstrates the value of constructively relating these two important areas of intellectual investigation **Theological Foundations for Environmental Ethics** Jame Schaefer, 2009 This book asks whether religion can make a positive contribution to preventing further destruction of biological diversity and ecosystems and threats to our earth The author reconstructs the teachings of Augustine Thomas Aquinas and other classic thinkers to reflect our current scientific understanding of the world **Views of Nature and Dualism** Thomas John Hastings, Knut-Willy Sæther, 2024-01-19 In the face of the anthropogenic threats to the singular planetary habitat we share with other human beings and non human species humanities scholars feel a renewed sense of urgency 1 to acknowledge the ways our species has funded particular histories

of environmental exploitation alienation and collapse 2 to unpack inherited assumptions that impact our views of nature and interspecies relations and 3 to suggest ways of thinking and acting that seek to repair the damage and promote mutual flourishing for all of earth inhabitants This volume brings together scholars in philosophy theology and religion who take up this urgent ethical task from a broad range of perspectives and locations

Perspectives on Science and Christian Faith, 2002 *A World Full of Gods* John Michael Greer, 2023-05-30 An investigation into the underpinnings and superstructures of the Pagan world view Pagan religions have tended to be more concerned with practice than with theory and in a system that has no dogma no legislated doctrine that is as it should be Yet as the movement grows and matures it is inevitable that we will begin to think in a more abstract way about our models and systems John Michael Greer has provided a primer on the kinds of ideas and themes that must be included in any discussion of the theology and philosophy of Neo pagan religions Much of the book takes shape in a dialogue with existing ideas in theology philosophy and comparative religion It looks to find a middle ground between too much and too little reference to the work of other scholars to find a comprehensible yet intellectually rigorous middle ground It aims to be part of a conversation that stretches out over the centuries Voices of polytheist spirituality have had little place in that conversation for many years but much of value has been said in their absence The rebirth of polytheism as a living religious tradition in the Western world will inevitably force a reassessment of much of that heritage and pose challenges to some of its most cherished assumptions Yet reassessment is not necessarily rejection and the traditions of modern polytheism are deeply enough indebted to legacies from the past that an attentive ear to earlier phases of the conversation is not out of place

American Catholic Philosophical Quarterly, 2000 *Everything, Briefly* Thomas O. Scarborough, 2022-06-14 As a man thinks so is he Personally and socially so is he Yet if this is true then as a man thinks has led us into the thick of global crisis What exactly is it about our thinking that fails us What has gone so wrong There are firm reasons why we may hope for new direction Firstly we have a new view of the connectedness of all things Never before has this encompassed so much It makes a crucial difference to philosophy Secondly when we recast philosophy's high level concepts in more concrete terms it becomes possible to discuss them without confusion This is the method of this book There is much of interest for the theologian too Legendary film director Ingmar Bergman once wrote What will happen to us who want to believe but can not His can not had to do with what Professor Karen Barad calls the hegemony of physics *Everything Briefly* details why it is impossible in fact to believe in a closed universe of cause and effect *AAR/SBL Annual Meeting Program* American Academy of Religion. Meeting, 1999 *The New Scholasticism*, 2000 Includes section Book Reviews
