Studies on finds in Roman Britain and the Western Provinces have come to greater prominence in the literature of recent years The quality of such work has also improved and is now theoretically informed and based on rich data sets Work on finds over the last decade or two has changed our understanding of the Roman era in profound ways and yet despite such encouraging advances and such clear worth there has to date been little in the way of a dedicated forum for the presentation and evaluation of current approaches to the study of material culture The conference at which these papers were initially presented has gone some way to redressing this and these papers bring the very latest studies on Roman finds to a wider audience Twenty papers are here presented covering various themes **Britannia** John Creighton, 2006-01-31 Completely re evaluates evidence for the rule of the kings of Late Iron Age Britain Frontiers of Colonialism Christine D. Beaulieu, 2017-07-11 For decades archaeologists have limited studies of frontiers and colonialism to a single polity empire or epoch This has been especially true of historical archaeologists but in this intriguing collection Beaulieu assembles archaeologists from around the world to determine the commonalities and differences of colonialism across the self imposed divide of contact v pre contact The work considers the expanding frontiers of the Romans Iroquois Egyptians Filipinos and the more familiar Mayan and Incan empires The goal of this volume is to expand the theoretical interpretations and perspectives to all archaeologists working in frontier colonial contexts not just those of the European empires **From the Sword to the Plough** Nico Roymans, 1996 Siedlung Landwirtschaft Arch obotanik Romanisierung Siedlungsgeschichte

been neglected in archaeology Focusing on the interrelationships between concepts of cultural identity today and the interpretation of past cultural groups Cultural Identity and Archaeology offers proactive archaeological perspectives in the debate surrounding European identities This fascinating and thought provoking book covers three key areas It considers how material remains are used in the interpretation of cultural identities for example pan Celtic culture and Bronze Age Europe Finally it looks at archaeological evidence for the construction of cultural identities in the European past The authors are critical of monolithic constructions of Europe and also of the ethnic and national groups within it in place of such exclusive cultural political and territorial entities the book argues for a consideration of the diverse hybrid and multiple nature of European cultural identities **Cultural Identity and Archaeology** P. Vindolanda. A Roman Military Settlement as a Legal Model of Integration Giuseppe Di Donato,2023 **The Power of Urban Water** Nicola Chiarenza,Annette Haug,Ulrich Müller,2020-05-05 Water is a global resource for modern societies and water was a global resource for pre modern societies The many different water systems serving processes of urbanisation and urban life in ancient times and the Middle Ages have hardly been researched until now The numerous contributions to this volume pose questions such as what the basic cultural significance of water was the power of water in the town and for the town from different points of view Symbolic aesthetic and cult aspects are taken up as is the role of water in politics society and economy in daily life but also in processes of urban planning or in urban neighbourhoods Not least the dangers of polluted water or of flooding presented a challenge to urban society The contributions in this volume draw attention to the complex manifold relations between water and human beings This collection presents the results of an international conference in Kiel in 2018 It is directed towards both scholars in ancient and mediaeval studies and all those interested in the diversity of water systems in urban space in ancient and mediaeval times *Ancient History: Key Themes and Approaches* Neville Morley,2002-09-09 Ancient History Key Themes and Approaches is a sourcebook of writings on ancient history It presents over 500 of the most important stimulating and provocative arguments by modern writers on the subject and as such constitutes an invaluable reference resource The first section deals with different aspects of life in the ancient world such as democracy imperialism slavery and sexuality while the second section covers the ideas of key ancient historians and other writers on classical antiquity Overall this book offers an invaluable introduction to the most important ideas theories and controversies in ancient history and a thought provoking survey of the range of views and approaches to the subject **Hadrian's Wall and the End of Empire** Rob Collins,2012-08-21 There is no synthetic or comprehensive treatment of any late Roman frontier in the English language to date despite the political and economic significance of the frontiers in the late antique period Examining Hadrian s Wall and the Roman frontier of northern England from the fourth

century into the Early Medieval period this book investigates a late frontier in transition from an imperial border zone to incorporation into Anglo Saxon kingdoms using both archaeological and documentary evidence With an emphasis on the late Roman occupation and Roman military it places the frontier in the broader imperial context In contrast to other works Hadrian s Wall and the End of Empire challenges existing ideas of decline collapse and transformation in the Roman period as well as its impact on local frontier communities Author Rob Collins analyzes in detail the *limitanei* the frontier soldiers of the late empire essential for the successful maintenance of the frontiers and the relationship between imperial authorities and local frontier dynamics Finally the impact of the end of the Roman period in Britain is assessed as well as the influence that the frontier had on the development of the Anglian kingdom of Northumbria

*Law in the Roman Provinces* Kimberley Czajkowski, Benedikt Eckhardt, Meret Strothmann, 2020-05-28 The study of the Roman Empire has changed dramatically in the last century with significant emphasis now placed on understanding the experiences of subject populations rather than a sole focus on the Roman imperial elites Local experiences and interactions between periphery and centre are an intrinsic component in our understanding of the empire s function over and against the earlier top down model But where does law fit into this new decentralized picture of empire This volume brings together internationally renowned scholars from both legal and historical backgrounds to study the operation of law in each region of the Roman Empire from Britain to Egypt from the first century BCE to the end of the third century CE Regional specificities are explored in detail alongside the emergence of common themes and activities in a series of case studies that together reveal a new and wide ranging picture of law in the Roman Empire balancing the practicalities of regional variation with the ideological constructs of law and empire
