Constantinople AD 717-18 Si Sheppard,2020-03-19 The siege of Constantinople in AD 717-18 was the supreme crisis of Western civilization The Byzantine Empire had been reeling under the onslaught of Arabic imperialism since the death of the Prophet whilst Jihadist armies had detached Syria Palestine Egypt and Carthage from imperial control and were in the process of imposing their ascendancy at sea The Empire had been reduced to its Anatolian and Balkan heartland and Arab incursions threatened even this Arab naval forces had appeared under the walls of Constantinople every year from AD 674 to 678 But all this was only a prelude to the massive combined arms invasion force that advanced on the capital in 717 This volume offers a comprehensive study of the ensuing clash between the ascendant Caliphate and the Empire at bay It details the forces available to each side with their respective advantages and vulnerabilities evaluating the leadership qualities of the rival commanders and assessing their strategic and tactical initiatives It also accounts for the trajectory and outcome of the campaign and emphasises the fundamental significance of the struggle By holding the line the Byzantines gave Europe enough time to develop at its own pace and emerge strong enough to face down its Islamic counterpart on equal terms If

Constantinople had fallen in 717 could Europe have endured as an independent entity Could Christianity have survived as major religion What would the future course of world history have been

Arms and Armour of the Warrior Saints Piotr Grotowski, 2010-09-24 The question of the independence of Byzantine iconography continues to draw attention Following extensive research on the persistence of Classical motifs in Byzantine art interest has recently turned to the originality of the latter and its reliability as a historical source This study examines whether military equipment armour weapons insignia and costume shown in images of the warrior saints reflects items actually used in the mid Byzantine Army or merely repeats Classical forms Such representations are compared with documentary evidence gathered chiefly from Byzantine military manuals The author demonstrates that military equipment being a vital branch of material culture subject to constant evolution provides a good indicator of iconographic innovation in the art of Byzantium
