Engineering the Eternal City Pamela O. Long, 2018-11-20 Between the catastrophic flood of the Tiber River in 1557 and the death of the engineering pope Sixtus V in 1590 the city of Rome was transformed by intense activity involving building construction and engineering projects of all kinds Using hundreds of archival documents and primary sources Engineering the Eternal City explores the processes and people involved in these infrastructure projects sewers bridge repair flood prevention aqueduct construction the building of new straight streets and even the relocation of immensely heavy ancient Egyptian obelisks that Roman emperors had carried to the city centuries before This portrait of an early modern Rome examines the many conflicts failures and successes that shaped the city as decision makers tried to control not only Rome's structures and infrastructures but also the people who lived there Taking up visual images of the city created during the same period most importantly in maps and urban representations this book shows how in a time before the development of modern professionalism and modern bureaucracies there was far more wide ranging conversation among people of various backgrounds on issues of engineering and infrastructure than there is in our own times Physicians civic leaders jurists cardinals popes and clerics engaged with painters sculptors architects printers and other practitioners as they discussed argued and completed the projects that remade Rome

Roads and Ruins Paul Baxa,2010-01-01 In the 1930s the Italian Fascist regime profoundly changed the landscape of Rome s historic centre demolishing buildings and displacing thousands of Romans in order to display the ruins of the pre Christian Roman Empire This transformation is commonly interpreted as a failed attempt to harmonize urban planning with Fascism s ideological exaltation of the Roman Empire Roads and Ruins argues that the chaotic Fascist cityscape filled with traffic and crumbling ruins was in fact a reflection of the landscape of the First World War In the radical interwar transformation of Roman space Paul Baxa finds the embodiment of the Fascist exaltation of speed and destruction with both roads and ruins defining the cultural impulses at the heart of the movement Drawing on a wide variety of sources including war diaries memoirs paintings films and government archives Roads and Ruins is a richly textured study that offers an original perspective on a well known story
